Remixing the Landscape Architecture History Class Daniel C. Jost,2015 The pedagogical goals for landscape architecture history courses required as part of the curriculum in professional degree programs in landscape architecture vary from school to school One goal of some of these courses has been to provide a broad survey of the field of landscape architecture But analysis shows some of the major design challenges and project types designers face today have minimal representation in the imagery in Elizabeth Barlow Rogers s *Landscape Design A Cultural and Architectural History* which many landscape architecture history classes in the U S use as a primary text This project explored how a one quarter survey of historical landscapes that is offered as part of a landscape architect s professional education might be taught in a way that more closely correlates with some of the work designers are involved with today as described by the American Society of Landscape Architects and the U S Bureau of Labor Statistics I remixed Rogers s textbook together with other sources to provide a topically stylistically culturally and chronologically broad introduction to the landscape architecture field that provides professional students a variety of examples of how they might learn from historical works of landscape architecture Prior to creating this class interviews were conducted to understand how current surveys of landscape architecture history that are required within the professional landscape architecture curriculum were being taught in an attempt to build on this understanding The class resulting from these explorations was taught in the spring of 2015 at the University of Washington Reflections are provided on the experience

The Modern Garden Pierluigi Serraino,2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals
