Computational Modeling In Cognition Principles And Practice:

Computational Modeling in Cognition Stephan Lewandowsky, Simon Farrell, 2010-11-29 An accessible introduction to the principles of computational and mathematical modeling in psychology and cognitive science This practical and readable work provides students and researchers who are new to cognitive modeling with the background and core knowledge they need to interpret published reports and develop and apply models of their own The book is structured to help readers understand the logic of individual component techniques and their relationships to each other

Computational Modeling of Cognition and Behavior Simon Farrell, Stephan Lewandowsky, 2018-02-22 This book presents an integrated framework for developing and testing computational models in psychology and related disciplines Researchers and students are given the knowledge and tools to interpret models published in their area as well as to develop fit and test their own models

Stevens' Handbook of Experimental Psychology and Cognitive Neuroscience, Methodology, 2018-02-12 V Methodology E J Wagenmakers Volume Editor Topics covered include methods and models in categorization cultural consensus theory network models for clinical psychology response time modeling analyzing neural time series data models and methods for reinforcement learning convergent methods of memory research theories for discriminating signal from noise bayesian cognitive modeling mathematical modeling in cognition and cognitive neuroscience the stop signal paradigm hypothesis testing and statistical inference model comparison in psychology fmri neural recordings open science neural networks and neurocomputational modeling serial versus parallel processing methods in psychophysics

[An Introduction to Model-Based Cognitive Neuroscience](#) Birte U. Forstmann, Eric-Jan Wagenmakers, 2015-04-20 Two recent innovations the emergence of formal cognitive models and the addition of cognitive neuroscience data to the traditional behavioral data have resulted in the birth of a new interdisciplinary field of study model based cognitive neuroscience Despite the increasing scientific interest in model based cognitive neuroscience few active researchers and even fewer students have a good knowledge of the two constituent disciplines The main goal of this edited collection is to promote the integration of cognitive modeling and cognitive neuroscience Experts in the field will provide tutorial style chapters that explain particular techniques and highlight their usefulness through concrete examples and numerous case studies The book will also include a thorough list of references pointing the reader towards additional literature and online resources

The Psychology Research Handbook Frederick T. L. Leong, James T. Austin, 2023-11-16 In the Third Edition of *The Psychology Research Handbook* editors Frederick T L Leong and James T Austin have assembled experienced expert researchers to provide graduate students and research assistants with a comprehensive framework for conducting many types of psychology research The book is organized around the idea of a research script following the step by step process of research planning design data collection analysis and disseminating research Many chapters are coauthored by advanced graduate students to give their fellow students a sense of real world research adding to the clarity and practicality of many chapters Students and instructors alike

will appreciate chapters on topics typically missing from introductory methods texts including applying for research grants dealing with journal editors and reviewers working within research teams and conducting cross cultural research Structures such as recommended readings and exercises guide students to develop and expand their research skills New chapters include Power and Evidence IRB as Critical Collaborators in Research Alternative Data Collection Strategies Structural Equation Modeling and Replicability and Reproducibility A comprehensive easy to understand guide to the entire research process this book quickly and efficiently equips advanced students and research assistants to conduct a full research project

Handbook of Research on the Psychological Contract at Work Yannick Griep, Cary Cooper, 2019 The psychological contract is considered a critical construct in organizational behavior literature because it informs employee emotions attitudes and behaviors in the workplace Although the psychological contract has been explored extensively over the last 50 years numerous theoretical conceptual empirical methodological and analytical changes have pushed the field forward As such it is time to take stock and move forward The contributors to this Handbook explore in detail this important component of modern management thinking

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In broad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e.g. minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained

Aging and Cognition Hayden B. Bosworth, Christopher K. Hertzog, 2009 As the world's population ages the study of aging and its effects on cognition

becomes increasingly important Aging and Cognition Research Methodologies and Empirical Advances takes an interdisciplinary look at cognitive aging how it happens and how to study it The first part of the book explores methods for measuring cognitive change including how to study cohort effects How can we account for differences in cognitive performance from one cohort to another Should we assume factor invariance across cohorts or time These issues are treated in the context of new and existing empirical research making the discussion of methodological issues more concrete and accessible The second part of the book explores the social and psychological factors associated with cognitive aging For example to what extent do socioeconomic status optimism and personal sense of control affect aging Is the controversial use it or lose it theory of cognition valid Finally the concluding section explores how to use research findings to improve the everyday functioning of adults a challenging task because everyday functioning relies on complex cognitive tasks and most cognitive research measures only basic cognitive tasks The chapter in this final section uses medication adherence as an example of deriving real world solutions from cognitive research results With its emphasis on social and contextual factors that influence aging this book showcases both substantive and methodological developments in the field It will be useful to everyone who studies aging and cognition Jacket PsycINFO Database Record c 2009 APA all rights reserved
