

Chapter 3 - Respiratory System

Asthma

Lifestyle changes include: weight loss, stopping smoking and breathing exercise programmes (as an adjuvant to drug treatment) to improve quality of life + reduce symptoms.

Asthma is a chronic **inflammatory condition of the airways** characterised by **BRONCHOCONSTRICTION**.

The most frequent symptoms are **cough**, **wheezing**, **chest tightness** and **shortness of breath**. The Bronchoconstriction is usually reversible (either spontaneously or with use of medicine) leading to intermittent symptoms.

Occasionally asthma symptoms can get gradually or suddenly worse provoking an acute asthma attack that if severe, may require hospitalisation

Management of Chronic asthma (Adults and children over 5 years)

- 1st Line: Inhaled **short-acting beta₂ agonist** (e.g. Salbutamol) used **as required**.

If patient presents with **any one** of the following: **using inhaled beta₂ agonist 3 times a week or more**, being **symptomatic 3 times a week or more**, experiencing **night-time symptoms at least once a week** or had an **asthma attack in the last 2 years** → MOVE TO STEP 2

- 2nd Line: ADD a regular **inhaled standard-dose corticosteroid** (e.g. Beclometasone, Budesonide, Fluticasone, Mometasone).
 - Fluticasone and Mometasone provide **equal clinical activity** to Beclometasone and Budesonide at **HALF** the dosage
 - ICS should be taken initially **TWICE** daily, however the **same TOTAL dose** can be taken **ONCE** daily if good control is established.

In children, administration of high doses of ICS may be associated with growth failure, reduced bone mineral density and adrenal suppression.

- If **asthma** is **NOT ADEQUATELY controlled** → MOVE TO STEP 3

- 3rd Line: ADD a **Long-acting beta₂ agonist (LABA)** such as formoterol or salmeterol to be used in **conjunction with the ICS**.

- If the patient is gaining **some benefit** from addition of LABA but control is *inadequate*, then continue LABA and **↑** dose of ICS to top end of the range.

- If there is **no response** to the LABA, **discontinue** and **↑** dose of ICS.

- If control is still **INADEQUATE**, start a trial of either a **leukotriene receptor antagonist** (e.g. Montelukast), **modified-release Theophylline**, or **modified-release oral beta₂ agonist**. Leukotriene receptor antagonists are the preferred option in children.

- Before proceeding to Step 5, refer patients with inadequately controlled asthma to specialist care

Step 3 is up until Leukotriene receptor antagonist and Theophylline.
Step 4 is modified-release oral beta₂ agonist.

Chapter 3 Respiratory System

Terry C. Jones

Chapter 3 Respiratory System:

Right here, we have countless book **Chapter 3 Respiratory System** and collections to check out. We additionally give variant types and afterward type of the books to browse. The suitable book, fiction, history, novel, scientific research, as competently as various extra sorts of books are readily within reach here.

As this Chapter 3 Respiratory System, it ends occurring visceral one of the favored book Chapter 3 Respiratory System collections that we have. This is why you remain in the best website to see the amazing books to have.
