**The Future of Schooling in a GenAI World** John Fischetti, Scott Imig, Kylie Shaw, Phuong Quyen Vo, 2025-09-30 The Future of Schooling in a GenAI World uniquely addresses conversations with those inventing GenAI influencing policy and implementing it in schools *Artificial Intelligence and Society* Dr. R. B. Konda, Dr. Mahesh M. Ganwar, Prof. Kaveri Kori, Dr. Hanmanthappa Sedamkar, Dr. Manikamma S., Dr. Saibanna. & Dr. Mitradevi Halimani, 2024-11-08 The integration of AI powered e gamified modules in education has significantly impacted students scientific attitudes and academic achievement in science This study investigates how AI driven gamification enhances engagement critical thinking and problem solving skills leading to improved academic performance AI enables personalized learning experiences by adapting to individual student needs thus fostering a more interactive and learner centered approach E gamified modules provide immediate feedback motivating students to correct errors and reinforce learning The main aim of the study is to find out whether there is any significant difference between pre test post test mean scores of secondary school students taught with and without AI powered e gamified modules in science 80 Samples were chosen by

employing purposive sampling technique The researcher has used standardized PhET simulation modules The results show that the post test mean scores of the experimental group are significantly different than that of the control group The study suggests that when students are exposed to AI powered gamified learning environments they develop a more positive disposition toward scientific methods and show measurable improvements in performance This research highlights the potential of AI in transforming traditional education by making learning more dynamic personalized and effective thereby fostering a deeper understanding of science and its applications

Expert Systems and Artificial Intelligence in Decision Support Systems Henk G. Sol, Cees A.Th. Takkenberg, Pieter F. de Vries Robbé, 1987-03-31 In 1985 it was 20 years since Nobel Laureate Herbert A Simon published THE SHAPE OF AUTOMATION For Men and Management This short but important and still topical book dwells on three subjects The Long Range Economic Effects of Automation Will the Corporation be Managed by Machines The New Science of Management Decision In contrast with George Orwell who was a critic of contemporary political systems rather than a prophet Simon portrays a far more rosy picture of our brave new world Simon s work breathes optimism First computer technology looking back it is doubtful whether even the professor expected the hardware development we have witnessed Secondly our ability to tame the beast there is now not much reason for complacency and satisfaction Offices and factories can by no means be called automated at most semi automated Thirdly the organizational and social implications of these rapid technological developments referring to what he then called The Computer and the new decision making techniques Concerning this last point there is little need to emphasize that had been less practical application in organizations than the often impressive theoretical developments would lead one to believe In Europe this situation is even more acute than in the USA and Japan The ESPRIT programme of the ECC and many similar national programs intend to bridge the gap
