**Understanding the Technology Behind Online Offending** Christopher Wise,Jennifer Bamford,2025-02-25 Understanding the Technology Behind Online Offending A Guide for Professionals in the Criminal Justice System is a non technical explanation of online offences by a cybersecurity expert bridging the gap between the high tech world of cybercrime and the non technical professionals working within it The book begins by equipping the reader with a foundational understanding of how the internet works before exploring the various ways that people can exploit the Internet

to commit crimes The reader is then introduced to some of the sophisticated ways that individuals may evade detection before we explore the organisations fighting to prevent and capture those offending online The book includes a contributory chapter from solicitors at Stone King LLP to help the reader understand how the law is evolving to prosecute offenders There is a further contributory chapter from psychologist Dr Ruth J Tully who discusses psychological risk assessment with those who offend online The book concludes with important chapters looking at how professionals can keep themselves safe online and future directions of the internet The book s intended audience includes all professionals who work with those who commit online offences such as psychologists solicitors social workers probation officers and police officers The book is also suitable for those in training or graduate education

#### Toward Interactive and Intelligent Decision Support Systems

Yoshikazu Sawaragi, Koichi Inoue, Hirotaka Nakayama, 2012-12-06 In the past technological as well as economic forces dominated the evolution of industrial structures these factors have been treated extensively in numerous studies However another major factor which has begun to have a decisive influence on the performance of the chemical industry is technological risk and public and environmental health considerations in particular those related to toxic and hazardous substances used in industrial production processes The issues of controlling process risk waste streams and potential environmental consequences of accidental or routine release of hazardous chemicals are rapidly gaining in importance vis CI vis narrow economic considerations and are increasingly reflected in national and international legislation In the context of several ongoing R D projects aiming at the development of a new generation of tools for intelligent decision support two related problem areas that have been identified are i Structuring the industry or plant for the minimum cost of production as well as least risk e g toxicity of chemicals involved In this multi criteria framework we seek to resolve the conflict between industrial structure or plant design established by economic considerations and the one shaped by environmental concerns This can be formulated as a design problem for normal production conditions In section 3 1 and 3 2 an approach on how to deal with this problem at the industry and plant level is discussed

*The Guide to Expert Systems* Alex Goodall, 1985 **An Analysis of the Application of AI to the Development of Intelligent Aids for Flight Crew Tasks** Sheldon Baron, 1985
