*Principles of Strategic Communication* Derina Holtzhausen,Jami Fullerton,Bobbi Kay Lewis,2025-10-31 Now in a second edition this book introduces students to the theories of strategic communication and their application to everyday practice Key updates to the second edition include the use of artificial intelligence in the practice of strategic communication and a focus on health communication and crisis communication in the wake of a global pandemic personal branding social responsibility in an era of disinformation and the addition of models for ethical decision making It also features a completely updated chapter on new media and media metrics Each chapter includes introductory learning outcomes updated case studies a career profile of a current practitioner end of chapter discussion questions and boxes that highlight theory and research as well as the strategic communication industry insights Principles of Strategic Communication Second Edition is ideal as a core text for undergraduate students in strategic communication courses within media communication marketing and advertising programs The accompanying online resources feature chapter summaries useful links to examples of strategic communication in action suggested further reading and sample test questions Instructors will find an instructor s resource manual that includes sample syllabi class

activities lecture topics and a test bank New to this edition are PowerPoint slides for each chapter Please visit [www.routledge.com/9781032626284](http://www.routledge.com/9781032626284) to access these materials

**Literacy in the Disciplines** Thomas DeVere Wolsey, Diane Lapp, 2024-09-12 This book gives all teachers in grades 5-12 practical strategies for building the unique literacy skills that students need for success in their respective subject areas Drawing from interviews with leading educators and professionals in science mathematics history the arts and other disciplines the authors explain what disciplinary literacy is and discuss ways to teach close reading of complex texts discipline specific argumentation skills academic vocabulary the use of multimodal tools and graphic organizers and more User friendly features include classroom materials lesson plans practice activities and recommended online teaching videos

**Knowledge-based Systems for General Reference Work** John V. Richardson, 1995 By focusing on knowledge based systems technology the primary purpose and goal of this book is to improve the quality of reference service rendered in libraries Within reference service this book examines question answering a complex and difficult task For those interested in the theoretical aspects of reference work they have to look no further than the first chapter In addition the book features theoretical chapters on modelling the reference transaction a chapter on the logic of ready reference work and a chapter on the appropriate criteria to apply in selecting an expert system shell Several practical chapters focus on what KBS work has already been done in the field and evaluate nearly fifty expert system development shells so that readers can select the most appropriate shell for their domain The subtitle of the book is applications problems and progress in regard to expert systems in reference work Applications are covered most clearly in chapter 8 which reviews the more than extant prototypes Chapter 3 covers what is feasible chapter 4 models the reference transaction and chapter 7 covers interface issues so that future applications can be more successful Problems are covered throughout the book starting with chapter 1 which discusses the traditional emphasis on reference sources It argues that the field needs to shift toward procedural knowledge related to work in reference departments The chapter on expert system feasibility reveals that there are alternative ways of conceptualizing the intellectual work of an expert and of course chapter 9 directly points out limitations in extant systems Encouraging words occur in chapter 1 about the shift to a balanced or complete paradigm for doing reference work Similarly the chapter on modelling is optimistic in that reference work can be modelled and systems implemented which act like human experts The final chapter tries to avoid the technological optimism inherent in many books on expert systems by identifying the near term factors which will influence the development of expert systems

**Key Features** Historical background presenting the field's paradigmatic thinking Decision trees for basic formats of reference material Flowchart modelling the reference transaction Reviews of more than fifty extant KBS in general reference environments Evaluative criteria on more than forty expert system shells
