Package Maps R:

R Graphics, Third Edition Paul Murrell, 2018-11-15 This third edition of Paul Murrell's classic book on using R for graphics represents a major update with a complete overhaul in focus and scope. It focuses primarily on the two core graphics packages in R, *graphics* and *grid*, and has a new section on integrating graphics. This section includes three new chapters: importing external images into R, integrating the *graphics* and *grid* systems, and advanced SVG graphics. The emphasis in this third edition is on having the ability to produce detailed and customised graphics in a wide variety of formats, on being able to share and reuse those graphics, and on being able to integrate graphics from multiple systems. This book is aimed at all levels of R users. For people who are new to R, this book provides an overview of the graphics facilities which is useful for understanding what to expect from R's graphics functions and how to modify or add to the output they produce. For intermediate level R users, this book provides all of the information necessary to perform sophisticated customizations of plots produced in R. For advanced R users, this book contains vital information for producing coherent reusable and extensible graphics functions.

Displaying Time Series, Spatial, and Space-Time Data with R Oscar Perpinan Lamigueiro, 2018-09-03 Focusing on the exploration of data with visual methods, this book presents methods and R code for producing high quality static graphics, interactive visualizations, and animations of time series, spatial, and space-time data. Practical examples using real world datasets help you understand how to apply the methods and code. Each of the three parts of the book is devoted to different types of data. In each part, the chapters are grouped according to the various visualization methods or data characteristics. Recent developments in the *htmlwidgets* family of packages are covered in this second edition with many new interactive graphics.

Probability and Statistics with R Maria Dolores Ugarte, Ana F. Militino, Alan T. Arnholt, 2015-07-21 Since the publication of the popular first edition, the contributed R packages on CRAN have increased from around 1,000 to over 6,000. This second edition explores how some of these new packages make analysis easier and more intuitive, as well as create more visually pleasing graphs. Along with adding new examples and exercises, this edition improves the existing examples, problems, concepts, data, and functions. Data sets, R functions, and more are available online.

Incentivizing Peace Jaroslav Tir, Johannes Karreth, 2018-01-24 Civil wars are one of the most pressing problems facing the world. Common approaches such as mediation, intervention, and peacekeeping have produced some results in managing ongoing civil wars, but they fall short in preventing civil wars in the first place. *Incentivizing Peace* shows that considering civil wars from a developmental perspective presents opportunities to prevent the escalation of nascent, low-level armed conflicts to full-scale civil wars.
