Introductory Econometrics Humberto Barreto, Frank Howland, 2006 This highly accessible and innovative text with supporting web site uses Excel R to teach the core concepts of econometrics without advanced mathematics It enables students to use Monte Carlo simulations in order to understand the data generating process and sampling distribution Intelligent repetition of concrete examples effectively conveys the properties of the ordinary least squares OLS estimator and the nature of heteroskedasticity and autocorrelation Coverage includes omitted variables binary response models basic time series and simultaneous equations The authors teach students how to construct their own real world data sets drawn from the internet which they can analyze with Excel R or with other econometric software The accompanying web site with text support can be found at www.wabash.edu/econometrics *Introductory Econometrics: Using Monte Carlo Simulation with Microsoft Excel* Humberto Barreto, Humberto Barreto & Frank M. Howland, 2009-11-01 This highly accessible and innovative text and accompanying CD ROM use Excel R workbooks powered by Visual Basic macros to teach the core concepts of econometrics without advanced mathematics It enables students to run Monte Carlo simulations in order to understand the data generating process and sampling distribution Intelligent repetition of concrete examples effectively conveys the properties of the ordinary least squares OLS estimator and the nature of heteroskedasticity and autocorrelation Coverage includes omitted variables binary response models basic time series and simultaneous equations The authors teach students how to construct their own real world data sets drawn from the internet which they can analyze with Excel R or with other econometric software The Excel add ins allow students to draw histograms to compute P values and robust standard errors and to construct their own Monte Carlo and bootstrap simulations For more readers may visit the web site at www.wabash.edu/econometrics Introduction to Statistics in Metrology Stephen Crowder, Collin Delker, Eric Forrest, Nevin Martin, 2020-11-30 This book provides an overview of the application of statistical methods to problems in metrology with emphasis on modelling measurement processes and quantifying their associated uncertainties It covers everything from fundamentals to more advanced special topics each illustrated with case studies from the authors work in the Nuclear Security Enterprise NSE The material provides readers with a solid understanding of how to apply the techniques to metrology studies in a wide variety of contexts The volume offers particular attention to uncertainty in decision making design of experiments DOEx and curve fitting along with special topics such as statistical process control SPC assessment of binary measurement systems and new results on sample size selection in metrology studies The methodologies presented are supported with R script when appropriate and the code has been made available for readers to use in their own applications Designed to promote collaboration between statistics and metrology this book will be of use to practitioners of metrology as well as students and researchers in statistics and engineering disciplines Demystifying Causal Inference Vikram Dayal, Anand Murugesan, 2023-09-29 This book provides an accessible introduction to causal inference and data analysis with

R specifically for a public policy audience It aims to demystify these topics by presenting them through practical policy examples from a range of disciplines It provides a hands on approach to working with data in R using the popular tidyverse package High quality R packages for specific causal inference techniques like ggdag Matching rdrobust dosearch etc are used in the book The book is in two parts The first part begins with a detailed narrative about John Snow s heroic investigations into the cause of cholera The chapters that follow cover basic elements of R regression and an introduction to causality using the potential outcomes framework and causal graphs The second part covers specific causal inference methods including experiments matching panel data difference in differences regression discontinuity design instrumental variables and meta analysis with the help of empirical case studies of policy issues The book adopts a layered approach that makes it accessible and intuitive using helpful concepts applications simulation and data graphs Many public policy questions are inherently causal such as the effect of a policy on a particular outcome Hence the book would not only be of interest to students in public policy and executive education but also to anyone interested in analysing data for application to public policy
