Finding Time For Fitness Is Never Easy, But Home Training Could Provide The Answer. From assembling a few pieces of basic training equipment to setting up a complete gym in a room in your house, at-home workouts could be the key to your fitness. Home fitness entails exactly what it implies: executing your personal fitness routine while at home using a variety of different techniques. Home fitness has been in our lives for decades, and it's taken on a new role since the Covid-19 pandemic closed gyms around the world. Whether it's a yoga class on Zoom or panic buying a Peloton, many of us are trying to find ways to exercise effectively within four walls. Whether you are looking to improve your cardiovascular system, lose weight, gain lean muscle mass, or just stay active, in-home training has a place in your life. And the benefits of staying fit are no secret: Improvements in cardiovascular and respiratory health, better regulation of blood sugar, the potential to reduce or eliminate prescription medications such as for diabetes or blood pressure, weight loss, reduction in cancer risk, and improved musculoskeletal strength are some of the better-known. But when you're working out at home, you're responsible for the whole plan. What exercises should you do? How many reps of each? How often should you rest? Are you feeling a cardio workout, an upper-body workout, or do you want to fit in a total-body workout instead? For many of us, answering all these questions is an added stress we'd rather avoid right now. And the good news is that's something you can avoid without skipping your workout. We are about to show you an immaculate at-home workout program that takes the guesswork out for you and will give you the whole exercise plan. *Fire Your Gym!*

[Advanced Bodyweight Exercises](#) Patrick Barrett, 2012 Bodyweight exercise is probably the most under appreciated tool out there for losing weight building muscle and staying healthy Every day millions of people waste time and money on expensive gym memberships and home workout equipment when there is an easier more practical solution right under their noses Don t get me wrong I m not saying that you can t get great results from working out at a gym or from exercising on in home workout equipment If you can stick with that kind of program and you ve got the money the time and the room you can do very well I m simply saying that for many people these solutions are impractical and they end up paying monthly for memberships at fitness centers they don t go to or paying for weights and equipment that end up collecting dust in storage somewhere Meanwhile a tiny fraction of that same investment if spent learning about bodyweight exercise could give vastly better results Many people think that bodyweight exercise is just not challenging enough to give you a good workout they see it as more of a warm up than anything else Well there certainly are easy bodyweight exercises that can be used to warm up There are also exercises like muscle ups and one leg squats that many weight lifters and other

athletes cannot even perform for a single repetition Don't underestimate the value of this type of training program Once you know what the more advanced bodyweight exercises can do for you you'll have a workout routine that you can use conveniently for your entire life whether you're at home or on the road whether you've got two hours free to work out or only 15 minutes This kind of convenience means that sticking to a schedule is easier and more practical than ever because you don't have to make time for the gym commute you only have to make time for the exercise itself Most people fail to appreciate when it comes to getting fit and staying that way that anyone can build the perfect schedule or routine You know what I'm talking about the routine that's supposed to transform you into some kind of bodybuilder super hero crossed with an Olympic gymnast Unfortunately most people cannot plan their lives around such a routine and if they try they end up failing and getting even more discouraged and out of shape What really counts is not making the perfect plan but creating a solid plan that you will actually stick to That's what's so great about bodyweight exercise unlike so many other options it's both effective AND practical If you're brand new to bodyweight exercise or exercise in general you may want to try my other book on the subject Natural Exercise It's geared more toward beginners However if you've already read that book or you're just ready for more of a challenge then Advanced Bodyweight Exercises is exactly what you need You'll learn all the exercises and variations you need to build real strength to last a lifetime So pick up your physical or digital copy of Advanced Bodyweight Exercises and start exercising right away for less than the cost of a single dumbbell or one day gym pass
