Artificial Intelligence and Universal Values Jay Friedenber,2024-07-14 The field of value alignment or more broadly machine ethics is becoming increasingly important as artificial intelligence developments accelerate By alignment we mean giving a generally intelligent software system the capability to act in ways that are beneficial or at least minimally harmful to humans There are a large number of techniques that are being experimented with but this work often fails to specify what values exactly we should be aligning When making a decision an agent is supposed to maximize the expected utility of its value function Classically this has been referred to as happiness but this is just one of many things that people value In order to resolve this issue we need to determine a set of human values that represent humanity s interests Although this problem might seem intractable research shows that people of various cultures and religions actually share more in common than they realize In this book we review world religions moral philosophy and evolutionary psychology to elucidate a common set of shared values We then show how these values can be used to address the alignment problem and conclude with problems and goals for future research The key audience for this book will be researchers in the field of ethics and artificial intelligence who are interested in or working on this problem These people will come from various professions and include philosophers computer programmers and psychologists as the problem itself is multi disciplinary

International Arbitration Audley William Sheppard,Chiann Bao,2025-12-15 International arbitration is built not only on legal norms and procedural frameworks but by the individuals who craft interpret and implement them This book explores how human qualities such as perception reasoning and culture inform the daily practice of international arbitration The volume gathers contributions presented at the twenty sixth Congress of the International Council for Commercial Arbitration ICCA held in Hong Kong in May 2024 under the theme International Arbitration A Human Endeavour Framed as both a statement and a

provocation the theme invites critical reflection on the role of the individual in a system often portrayed as neutral objective and abstract Across fifty one chapters from fifteen thematic panels the book explores questions at the heart of arbitral practice Unveiling the Human Dimension in International Arbitration The Arbitrator Decision Making and Biases Sociology and Education Judging the New York Convention Culture Localisation and Regionalism The Advocate Procedures and Behaviours It s Not Just Semantics The Hidden Power of Language Inter Personal Conduct and Ethics Dispute Resolution and the Global Community Working in an Adversarial Environment Costs and Economics and International Arbitration An AI Endeavour Set against a backdrop of global change and increased attention to inclusivity transparency and accountability in arbitration the chapters offer timely and candid reflections on the lived experience of arbitration They examine how the human element continues to shape arbitral justice today but also how it may be redefined in a future increasingly influenced by social and technological changes Together the contributions paint a picture of international arbitration as a profoundly human endeavour shaped by those who practice it and those who will redefine its future
