Bitcoin's monetary policy and its economic cycles The fourth and final chapter of the book examines the technical foundations through the study of Bitcoin's four main components the peer to peer network and its nodes the blockchain and its transactions the decentralized system for blocks and transactions verification and the mining or Proof of Work consensus mechanism The chapter also provides a brief introduction to the Lightning Network a second layer solution built on top of Bitcoin Students in my classes frequently ask me how long it takes me to prepare the sessions where I explain Bitcoin They refer to the preparation of the material My response usually surprises them more than five years and fifteen thousand hours of reading studying and building My classes and this book are intended to help others shorten the learning curve and avoid the misinformation that frequently surrounds this wonderful invention Let me guide you on an incredible journey of learning what Bitcoin is and how it works the decentralized digital money of the future and one of the most important inventions of the 21st century
