major in college needs a rigorous program to prepare them while they are still in high school This book utilizes a format
where the application of several disciplines science math and language arts principles are mandated Each lab concludes with
either an essay or a detailed analysis of what happened and why it happened This format is based on the expectations of
joining a university program or becoming an industrial science professional The ideal student lab report would be written in a
lab research notebook and then the essay or final analysis is done on a word processor to allow for repeat editing and
corrections The research notebook has all graph pages a title section and a place for the students and their assistants to sign
and witness that exercise The basic mechanics of the lab report title purpose procedure diagrams data table math and
calculations observations and graphs are handwritten into the book The conclusion is done on a word processor MS Word
which allows the instructor to guide the student in writing and editing a complete essay using the MLA format When the final
copy is completed the essay is printed and inserted into the lab notebook for grading At the end of the term the student has
all their labs in one place for future reference These lab notebooks can be obtained for as little as 3 00 per book This is
money well spent In our district the Board of Education buys the books for each student The BOE sees these books as
