Inductive Biases in Machine Learning for Robotics and Control Michael Lutter, 2023-07-31 One important robotics problem is How can one program a robot to perform a task Classical robotics solves this problem by manually engineering modules for state estimation planning and control In contrast robot learning solely relies on black box models and data This book shows that these two approaches of classical engineering and black box machine learning are not mutually exclusive To solve tasks with robots one can transfer insights from classical robotics to deep networks and obtain better learning algorithms for robotics and control To highlight that incorporating existing knowledge as inductive biases in machine learning algorithms improves performance this book covers different approaches for learning dynamics models and learning robust control policies The presented algorithms leverage the knowledge of Newtonian Mechanics Lagrangian Mechanics as well as the Hamilton Jacobi Isaacs differential equation as inductive bias and are evaluated on physical robots

Experimental Robotics Bruno Siciliano, Cecilia Laschi, Oussama Khatib, 2021-03-27 This book is the volume of the proceedings for the 17th Edition of ISER The goal of ISER International Symposium on Experimental Robotics symposia is to provide a single track forum on the current developments and new directions of experimental robotics The series has traditionally attracted a wide readership of researchers and practitioners interested to the advances and innovations of robotics technology The 54 contributions cover a wide range of topics in robotics and are organized in 9 chapters aerial robots design and prototyping field robotics human robot interaction machine learning mapping and localization multi robots perception planning and control Experimental validation of algorithms concepts or techniques is the common thread running through this large research collection Chapter A New Conversion Method to Evaluate the Hazard Potential of Collaborative Robots in Free Collisions is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

System Simulation Techniques with MATLAB and Simulink Dingyi Xue, Yang Chen, 2013-09-16 System Simulation Techniques with MATLAB and Simulink comprehensively explains how to use MATLAB and Simulink to perform dynamic systems simulation tasks for engineering and non engineering applications This book begins with covering the fundamentals of MATLAB programming and applications and the solutions to different mathematical problems in simulation The fundamentals of Simulink modelling and simulation are then presented followed by coverage of intermediate level modelling skills and more advanced techniques in Simulink modelling and applications Finally the modelling and simulation of engineering and non engineering systems are presented The areas covered include electrical electronic systems mechanical systems pharmacokinetic systems video and image processing systems and discrete event systems Hardware in the loop simulation and real time application are also discussed Key features Progressive building of simulation skills using Simulink from basics through to advanced levels with illustrations and examples Wide coverage of simulation topics of applications from engineering to non engineering systems Dedicated chapter on hardware in the loop simulation and real
