Applications and Prospects Swapna Thacheril Sukumaran, Shiburaj Sugathan, Sabu Abdulhameed, 2020-11-28 Food security and the medicinal needs of billions of people around the world are pressing global issues, and the biodiversity and sustainable utilization of plants is of great significance in this context. Further ethnobotanical studies are vital in the discovery of new drugs from indigenous medicinal plants, and plants with industrially important metabolites need to be cultivated to meet the growing market demand. In addition, the production of plant metabolites under in vitro conditions also has tremendous possibilities. The totipotency of plant cells plays a valuable role in the sustainable utilization of plant resources through cell tissue and organ culture. At the same time, production can be enhanced using productive cell lines, treatment with elicitors, changing nutritional parameters, and metabolic engineering. This book provides state-of-the-art information on biodiversity conservation, ethnobotany, various aspects of in vitro secondary metabolite production, bioprospecting from various plant groups, and drug discovery. It also discusses methods of extracting and characterizing drug leads from plant sources. **Best Holistic Life Magazine July 2024** Jana Short, 2024-07-03
