*Syntax of Dutch: Adjectives and Adjective Phrases* Hans Broekhuis, 2025-10-01 The Syntax of Dutch will be published in at least seven volumes in the period 2012-2016 and aims at presenting a synthesis of the currently available syntactic knowledge of Dutch. It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics. The volume *Adjectives and Adjective Phrases* discusses the internal make up as well as the distribution of adjective phrases. Topics that will be covered include complementation and modification of adjective phrases, comparative and superlative formation, the attributive, predicative and adverbial uses of adjective phrases. Special attention is paid to the so-called partitive genitive construction and the adverbial use of past passive participles and infinitives.

**A Political Economy of Attention, Mindfulness and Consumerism** Peter Doran, 2017-07-14 The power of capital is the power to target our attention, mould market-ready identities and reduce the public realm to an endless series of choices. This has far-reaching implications for our psychological, physical and spiritual well-being and ultimately for our global ecology. In this consumer age, the underlying teachings of Buddhist mindfulness offer more than individual well-being and resilience. They also offer new sources of critical inquiry into our collective condition and may point in time to regulatory initiatives in the field of well-being. This book draws together lively debates from the new economics of transition, commons and well-being, consumerism and the emerging role of mindfulness in popular culture. Engaged Buddhist practices and teachings correspond closely to insights in contemporary political philosophical investigations into the nature of power, notably by Michel Foucault. The attention economy can be understood as a new arena of struggle in our age of neoliberal governmentality, as the forces of enclosure having colonized forests, land and the bodies of workers are now extended to the realm of our minds and subjectivity. This poses questions about the recovery of the mindful commons, the practices we must cultivate to reclaim our attention, time and lives from the forces of capitalization. This is a valuable resource for students and scholars of environmental philosophy, environmental psychology, environmental sociology, well-being and new economics, political economy, environmental politics, the commons and law as well as Buddhist theory and philosophy.

**The Biblical Repository and Quarterly Observer**, 1836 **Social and structural aspects of language contact and change** Bettina Migge, Shelome Gooden, 2022-10-20 This book brings together papers that discuss social and structural aspects of language contact and language change. Several papers look at the relevance of historical documents to determine the linguistic nature of early contact varieties, while others investigate the specific processes of contact-induced change that were involved in the emergence and development of these languages. A third set of papers look at how new datasets and greater sensitivity to social issues can help to re-assess persistent theoretical and empirical questions as well as help to open up new avenues of research. In particular, they highlight the heterogeneity of contemporary language practices and attitudes often obscured in

sociolinguistic research The contributions all focus on language variation and change but investigate it from a variety of disciplinary and empirical perspectives and cover a range of linguistic contexts

*Grammatical Categories in Linguistics and Education* Holden Härtl, Katharina Zaychenko, 2024-11-04 This volume explores how grammatical categories as defined by theoretical linguistics are effectively implemented in language education Aiming to bridge the gap between linguistic research and language pedagogy it offers a detailed inquiry that spans theoretical frameworks and empirical data By presenting a series of insightful studies this work illustrates how findings from theoretical linguistics can be applied to enhance practical language instruction demonstrating the reciprocal enrichment of both fields Essential for linguists language educators and researchers interested in the intersections of grammar cognition and pedagogy the volume is organized into four engaging sections Each section illuminates the nuances of grammar teaching and language acquisition It begins with a theoretical analysis of linguistic categories across diverse languages progresses through the links between linguistic research and teaching methodologies and delves into the role of empirical data in classroom applications The final section focuses on the practical implementation of linguistic categories in language teaching promoting a deeper understanding of grammar as a dynamic component of language learning
