Risk Management and Public Service Reform Iniobong Enang, 2023-04-28 School education reform is a dynamic process It takes place in the context of changing institutional structures including society economy politics legislation and technology Yet there can be poor awareness of risk particularly social risk and its management during this process and more widely during public service reform PSR This book aims to promote new PSR understanding about social risk management It utilizes in depth case studies comprising two anonymous Scottish councils responsible for providing and reforming school education services Drawing mainly on risk management and structuration theories with elements of complexity leadership and institutional theories the book explains contextual issues around the reform of Scottish school education services SSES It illustrates that social risks associated with reform can be used to explain emerging threats
