Structures and Architecture. A Viable Urban Perspective? Marie Frier Hvejsel, Paulo J.S. Cruz, 2022-07-08

Structures and Architecture A Viable Urban Perspective contains extended abstracts of the research papers and prototype submissions presented at the Fifth International Conference on Structures and Architecture ICSA2022 Aalborg Denmark 6-8 July 2022. The book 578 pages also includes a USB with the full texts of the papers 1448 pages. The contributions on creative and scientific aspects in the conception and construction of structures as architecture and on the role of advanced digital industrial and craft based technologies in this matter represent a critical blend of scientific technical and practical novelties in both fields. Hence as part of the proceedings series Structures and Architecture the volume adds to a continuous exploration and development of the synergetic potentials of the fields of Structures and Architecture. With each volume further challenging the conditions problems and potentials related to the art practice and theory of teaching researching designing and building structures as vehicles towards a viable architecture of the urban environment. The volumes of the series appear once every three years in tandem with the conferences organized by the International Association of Structures and Architecture and are intended for a global readership of researchers practitioners and students including architects structural and construction engineers builders and building consultants constructors material suppliers planners urban designers anthropologists economists sociologists artists product manufacturers and other professionals involved in the design and realization of architectural structural and infrastructural projects.

Material Matters Katie Lloyd

Thomas, 2006-12-05. Bringing together texts and work by theorists and practitioners who are making material central to their work this book reflects the diverse areas of inquiry which are expanding current material discourse. Focusing on the cultural political economic technological and intellectual forces which shape material practices in architecture the contributors draw on disciplines ranging from philosophy history and pedagogy to art practice and digital and low tech fabrication. By paying critical attention to material a wide range of issues emerge which are otherwise excluded from architectural discourse issues that shape and determine the buildings we make the processes we use and the ways we understand them. Beautifully illustrated and designed this book is a unique collection which will be of great interest to architectural practitioners and theorists who want to consider the wider implications of material practice and to students who are developing their own
