Zimmerman, 2020-12-21 Much of the most interesting work in philosophy today is metaphysical in character. *Oxford Studies in Metaphysics* is a forum for the best new work in this flourishing field. OSM offers a broad view of the subject, featuring not only the traditionally central topics such as existence, identity, modality, time, and causation, but also the rich clusters of metaphysical questions in neighbouring fields such as philosophy of mind and philosophy of science. Besides independent essays, volumes will often contain a critical essay on a recent book or a symposium that allows participants to respond to one another's criticisms and questions. Anyone who wants to know what's happening in metaphysics can start here.

[The Flying Circus of Physics](#) Jearl Walker, 2006-06-30 Hurry! Hurry! Come one, come all! Meet a man who can pull two railroad passenger cars with his teeth and a real-life human cannonball. Come face-to-face with a dead rattlesnake that still bites. And unlock the secrets of a magician's bodiless head. Welcome to this updated edition of *The Flying Circus of Physics*, where death-defying stunts, high-flying acrobatics, strange curiosities, and mind-bending illusions bring to life the fascinating feats of physics in the world around us. In 1977, Wiley published the first edition of Jearl Walker's *The Flying Circus of Physics*, which has sold over 100,000 copies and become a cult classic in the physics community. *The Flying Circus* is a compendium of interesting real-world phenomena that can be explained using basic laws of physics. This new edition represents a thorough updating and modernization of the book. The new edition gives us the opportunity to highlight Jearl's creativity, his communication skills, and his ability to make physics interesting. Jearl Walker, Ph.D., professor of physics at Cleveland State University and the man who frequently walked on hot coals and lay on beds of nails, all in the name of science, is the first recipient of the Outstanding Teaching Award from Cleveland State's College of Science. The College's Faculty Affairs Committee selected Dr. Walker as the first honoree based on his impressive contributions to science teaching over the last 30 years. In fact, the award in future years will be named the Jearl Walker Outstanding Teaching Award in recognition of his many achievements. Jearl Walker received his B.S. in physics from MIT in 1967 and his Ph.D. in physics from the University of Maryland in 1973. His popular book *The Flying Circus of Physics* has been translated into at least 10 languages and is still being sold worldwide. For 16 years, he toured his fun-filled *Flying Circus* lecture throughout the U.S. and Canada, introducing

countless teachers to such physics phenomena as molecular adhesion by hanging spoons from his face and Leidenfrost's phenomenon by dipping his wet hand in molten lead without getting hurt. These lectures led to his national PBS television show *Kinetic Carnival* which ran for several years and won him a local Emmy Award. During his 13 years as a columnist with *Scientific American* magazine, Dr. Walker wrote 152 articles for the *The Amateur Scientist* section which were translated into at least 9 languages worldwide. His topics ranged from the physics of judo to the physics of béarnaise sauce and lemon meringue pie. In 1990 he took over the textbook *Fundamentals of Physics* from David Halliday and Robert Resnick and has now published the seventh edition of the book. He has appeared countless times on television and radio and in newspapers and magazines.
