Inside Franks presents complete coverage of the records and information lifecycle model encompassing paper, electronic, databases, office suites, email, and new media records, blogs, chat messages, and software as a service. Archival Arrangement and Description Lois Hamill, 2017-07-08 *Archival Arrangement and Description: Analog to Digital* teaches the core functions of arrangement and description. A historical summary grounds new archivists to assess proposed changes for digital files. After presenting the basics of arrangement and description processing for analog materials, the text segues to digital materials, incorporating the OAIS preservation model into a detailed sample workflow. Although accessioning and technical appraisal precede processing, they are discussed because they are performed differently for digital materials and create a different starting point for processing digital files. Description is external to the OAIS model but linked to it. Recent advances in description and its delivery are presented along with concerns for the ability of smaller

archives to participate in envisioned future developments that are technology reliant New specialties like digital curation and data curation show the continued relevance of archival expertise for the digital future Rich with extras the text includes and points to many readily web accessible additional resources
