**Bits and Atoms** Steven Livingston, 2014-02 Bits and Atoms explores the governance potential found in the explosive growth of digital information and communication technology in areas of limited statehood Until recently places without an effective state were also without the means to communicate internally or with the larger world Entire communities indeed entire nations were cut off and information was scarce and costly but all of that has changed Today places with weak or altogether missing state institutions are tied internally and to the larger world by widely available digital technology This book considers the political

ramifications of the unparalleled growth of mobile phones around the world 6 billion subscriptions in 2013 various open source digital mapping platforms high resolution remote sensing satellites and a variety of purpose built software applications for the provision of collective goods This revolution in access has created digitally enabled collective action in an era of relative information abundance as an alternative governance modality in areas of limited statehood The chapters in this book explore whether the growth in digital technology can fill the governance vacuum created by the absence of an effective state in North Africa the Middle East and the former Soviet Union Yet as potentially revolutionary as this technology can be to areas of limited statehood it still faces limitations This alternative governance modality can alert others in the polity that medicine effective policing clean water food and sanitation are needed in a particular place and time and it can facilitate more cost effective ways of getting them into place But as this book demonstrates bits can only do so much in the provision of atoms Bits and Atoms is a thought provoking look at the prospects for and limitations of digital technology to function in place of traditional state apparatuses *Advances in Manufacturing Technology XXXI* Simeon Keates,2017-08-15 The urgent need to keep pace with the accelerating globalization of manufacturing in the 21st century has produced rapid advances in manufacturing research development and innovation This book presents the proceedings of the 15th International Conference on Manufacturing Research ICMR 2017 which also incorporated the 32nd National Conference on Manufacturing Research NCMR and was held at the University of Greenwich London UK in September 2017 The conference brings together a broad community of researchers who share the common goal of developing and managing the technologies and operations key to sustaining the success of manufacturing businesses The book is divided into 13 parts covering topics such as advanced manufacturing technologies including additive ultra precision and nano manufacturing manufacturing systems digital and cyber physical systems product design and development including lifecycle management and supply chain collaboration information and communication including innovation and knowledge management and manufacturing management including lean sustainable and cost engineering With its comprehensive overview of current developments this book will be of interest to all those involved in manufacturing today **Airport Slots** Achim I. Czerny,2008 Over the past several decades commercial air traffic has been growing at a far greater rate than airport capacity causing airports to become increasingly congested How can we accommodate this increased traffic and at the same time alleviate traffic delays resulting from congestion Airport Slots provides a valuable contribution to the debate on how best to limit airport congestion The book s comprehensive treatment of the subject matter provides the reader with a one stop volume to explore airport congestion and slot allocation schemes offering valuable insights to academics and practitioners alike [Lessons and policy consequences of mathematical modelling in relation to ongoing pandemics](#) Theodore Gyle Lewis,Pierpaolo Ferrante,Waleed Isa Al Mannai,2023-10-31
