Filner,2001 Community

development is a complex approach to reducing poverty and empowering citizens. It involves thousands of Americans whose intentions are noble and often successful. Community developers have built affordable housing, created jobs, and attracted businesses. Importantly, community developers have enacted these changes with a strong commitment to citizen participation, developed in the mid sixties. Since its creation, community development has evolved from a few participatory and civil rights orientated organizations to a growth oriented incorporated set of institutions. In the process, community development has become a central feature of urban public policy and receives widespread support. Despite the strengths of community development and its participatory character, a deeper examination of citizen based empowerment and economic development programs suggests that there are limits to community development. While poor citizens are involved in community organizations, property owners and others consistently overpower them due to wealth and access disparities. Participation without the benefits of wealth does not necessarily translate into more political power. In addition, economic growth does not necessarily lead to greater economic equality. Growth often undermines equality by forcing poor citizens to support projects with only limited benefits. Large downtown projects, for example, primarily benefit wealth developers and those who work downtown. Community developers must support these projects because their main sources of funding, the Low Income Housing Tax Credit program LIHTC and Tax Increment Financing schemes TIF, depend on large development projects. Community developers are therefore structurally forced to support the very kinds of growth that create economic and political inequalities. Community development has therefore become incorporated in the growth regime through which power structurally limits the freedom of low wealth citizens. The component chapters explore how community development evolved from a participatory effort to mitigate poverty, inspired by civil rights activists and the New Left, into an incorporated set of institutions committed to growth.
