current industrial and civil development everyone is expressing a deep concern about the problem of environmental pollution
The majority of the global community has a vested interest in supporting and sustaining any move for the protection of
environment In the greater part of the last century it was the fast pace of industrialization galloping demand for energy and
reckless exploitation of natural resources that were mainly responsible for creating the problem of environmental pollution In
the current scenario high illiteracy rates of the developing nations leads to increasing environmental pollution When it comes
to the hazards of environmental pollution there is only a very thin dividing line between different countries One pollutes and
the other suffers there are no eventual winners without significant changes globally Pollution is posing serious threats to all
kinds of diversities on earth in particular plants The plant world is of vital importance for our planet It is a worldwide priority
aimed at better meeting the needs for food livelihoods and nature To meet the food demand of fast growing population global
food production will have to be doubled The sustainability of food production depends on the sustainability of plant resources
and using tolerant varieties to augment food production This volume therefore covers discussions on the recent
developments in this connection and the emerging role of plants as indicators remediation and such related issues as
biodiversity conservation and the effects of on edible plants It reviews issues concerning the future of plant life Taking
