Installation Instructions

Before You Start

A. Is this product compatible with the vehicle?

- Please visit <http://www.pac-audio.com/swixprogramming/swixprogramming.asp> for the most current list of compatible vehicles.

B. Prepare for the installation.

- If possible, install the SWI-RC while you are installing the new head unit. Keep in mind you may need to plug in the factory stereo to locate certain wires; therefore do not complete the head unit installation until the SWI-RC is working properly.
- Plan a general installation location for both the SWI-RC plug and the control body. Keep in mind that the supplied wire harness is two feet long, and the 16F plug harness is three feet long.
- Use a multimeter or approved measuring device for checking vehicle circuits.

For Alpine, Clarion, JVC, Pioneer, Sony or Valor radios, connect the SWI-RC 16F plug into the radio's Steering Wheel input jack on back of radio or wire harness. For Kenwood or OEM radios, connect the blue/yel wire to the remote input wire (blue/yel or yellow for Kenwood, gray for OEM) of radio.

Blaupunkt radios with optional wireless remote inputs are supported by the SWI-RC, however we do not supply any connectors or support for Blaupunkt. It is up to the consumer or installer to supply this connector. Use vehicle Connector Chart and use VW connector as reference. Connect the SWI-RC's blue/yel wire to pin #11 of VW connector. The connector you obtain may come with two or three pieces, however the connector (usually green) should show pin #11 on it.
