someone who's done it. I don't manage other people's money. I don't sell financial products. I don't earn commissions on trades. I have nothing to sell you except the information in this book. The same approach that's built substantial wealth for me over the past decade. The advice in these pages is fundamentally different from what you'll hear from financial professionals. I learned from investors who actually made money, not from textbooks written by academics. I think about stocks as a business owner, not as a finance professional calculating risk metrics. Business owners think about value, growth, competitive advantages, and long-term prospects. Financial professionals think about asset allocation, risk-adjusted returns, and portfolio optimization. One of these approaches consistently makes money. The other keeps financial professionals employed. Who this book is for: This book is for intelligent people who want to take control of their investments but are tired of advice that seems designed to benefit everyone except the investor. It's for people who can think independently and are willing to question conventional wisdom. It's not a get-rich-quick scheme. It's not day trading. It's a thoughtful, common-sense approach to building wealth through stock investing, the kind of approach that works when your own money is at stake. If you're ready to think like a business owner and learn from investors who actually succeeded, this book will show you how.
