
Chapter 2 Solutions

Review Questions

1. What are some initial assessments you should make for a computing investigation?
Talk to others involved in the case and ask about the incident.
Determine whether law enforcement or company security officers already seized the computer evidence.
Determine whether the computer was used to commit a crime or contains evidence about the crime.
2. What are some ways to determine the resources needed for an investigation?
Determine the OS of the suspect computer.
List the necessary software to use for the examination.
3. List three items that should be on an evidence custody form.
Possible answers include case number, name of the investigator assigned to the case, nature of the case, location where evidence was obtained, description of the evidence, and so on.
4. Why should you do a standard risk assessment to prepare for an investigation?
to list problems that might happen when conducting your investigation as an aid in planning your case.
5. You should always prove the allegations made by the person who hired you. True or False?
False
6. For digital evidence, an evidence bag is typically made of antistatic material. True or False?
True
7. Who should have access to a secure container?
b. Only the investigators in the group
8. For employee termination cases, what types of investigations do you typically encounter?
hostile work environment caused by inappropriate Internet use
sending harassing e-mail messages
9. Why should your evidence media be write-protected?
to ensure that data isn't altered
10. List three items that should be in your case report.
Answers can include an explanation of basic computer and network processes, a narrative of what steps you took, a description of your findings, and log files generated from your analysis tools.
11. Why should you critique your case after it's finished?
to improve your work.
12. What do you call a list of people who have had physical possession of the evidence?
