An Analytical Formulation For Sizing And Estimating The:

Analytical Formulation for Sizing and Estimating the Dimensions and Weight of Wind Turbine Hub and Drivetrain Components, 2015 This report summarizes the theory verification and validation of a new sizing tool for wind turbine drivetrain components the Drivetrain Systems Engineering DriveSE tool DriveSE calculates the dimensions and mass properties of the hub main shaft main bearing s gearbox bedplate transformer if up tower and yaw system The level of fidelity for each component varies depending on whether semiempirical parametric or physics based models are used The physics based models have internal iteration schemes based on system constraints and design criteria Every model is validated against available industry data or finite element analysis The verification and validation results show that the models reasonably capture primary drivers for the sizing and design of major drivetrain components

Handbook of Pharmaceutical Manufacturing Formulations, Third Edition Sarfaraz K. Niazi, 2019-11-25 The Handbook of Pharmaceutical Manufacturing Formulations Third Edition Volume Two Uncompressed Solid Products is an authoritative and practical guide to the art and science of formulating drugs for commercial manufacturing With thoroughly revised and expanded content this second volume of a six volume set compiles data from FDA and EMA new drug applications patents and patent applications and other sources of generic and proprietary formulations including author s own experience to cover the broad spectrum of cGMP formulations and issues in using these formulations in a commercial setting A must have collection for pharmaceutical manufacturers educational institutions and regulatory authorities this is an excellent platform for drug companies to benchmark their products and for generic companies to formulate drugs coming off

patent Features Largest source of authoritative and practical formulations cGMP compliance guidance and self audit suggestions Differs from other publications on formulation science in that it focuses on readily scalable commercial formulations that can be adopted for cGMP manufacturing Tackles common difficulties in formulating drugs and presents details on stability testing bioequivalence testing and full compliance with drug product safety elements Written by a well recognized authority on drug and dosage form development including biological drugs and alternative medicines

Performance Evaluation for Network Services, Systems and Protocols Stênio Fernandes,2017-03-21 This book provides a comprehensive view of the methods and approaches for performance evaluation of computer networks It offers a clear and logical introduction to the topic covering both fundamental concepts and practical aspects It enables the reader to answer a series of questions regarding performance evaluation in modern computer networking scenarios such as What where and when to measure Which time scale is more appropriate for a particular measurement and analysis Experimentation simulation or emulation Why and How do I best design a sound performance evaluation plan The book includes concrete examples and applications in the important aspects of experimentation simulation and emulation and analytical modeling with strong support from the scientific literature It enables the identification of common shortcomings and highlights where students researchers and engineers should focus to conduct sound performance evaluation This book is a useful guide to advanced undergraduates and graduate students network engineers and researchers who plan and design proper performance evaluation of computer networks and services Previous knowledge of computer networks concepts mechanisms and protocols is assumed Although the book provides a quick review on applied statistics in computer networking familiarity with basic statistics is an asset It is suitable for advanced courses on computer networking as well as for more specific courses as a secondary textbook

Challenges in Protein Product Development Nicholas W. Warne,Hanns-Christian Mahler,2018-06-20 In this volume the authors discuss the many significant challenges currently faced in biotechnology dosage form development providing guidance shared experience and thoughtful reflection on how best to address these potential concerns As the field of therapeutic recombinant therapeutic proteins enters its fourth decade and the market for biopharmaceuticals becomes increasingly competitive companies are increasingly dedicating resources to develop innovative biopharmaceuticals to address unmet medical needs Often the pharmaceutical development scientist is encountering challenging pharmaceutical properties of a given protein or by the demands placed on the product by stability manufacturing and preclinical or clinical expectations as well as the evolving regulatory expectations and landscape Further there have been new findings that require close assessment as for example those related to excipient quality processing viscosity and device compatibility and administration solubility and opalescence and container closure selection The literature varies widely in its discussion of these critical elements and consensus does not exist This topic is receiving a great deal of attention within the biotechnology industry as well as with academic researchers and regulatory agencies globally Therefore this book
