thought His quest was to peel away the surface of different cultures through careful interpretation advancing from one layer to another until he discovered the structures that lay behind all of the exterior practices and meanings Infamously challenging his work shows interpretative skills working at the highest most abstract level possible *Western Social Thought, Vol. 2: The Contemporary Masters* J.P. Moyer,1975 This study is directed towards providing basic background material for the understanding of South Sumatran social organisation To this end four legal codes from the first half of the nineteenth century are presented and analysed The method used in the analysis is a modification of that used by Levi Strauss for the analysis of myth The author concludes by stating Out of these detailed analyses the most significant phenomenon to emerge is the fact that a relatively small number of formal properties are distributed through a large number of structures within a single legal code and because of their formal similarities these structures are mutually reinforcing **VKI** ,1975 Cultural Anthropology Conrad Phillip Kottak,1991 **Frederick Douglass's Narrative of the Life of Frederick Douglass** Harold Bloom,1988 **Society as Semiosis** Risto Heiskala,2003 Action theory phenomenological sociology pragmatism and post structuralism are often seen as mutually exclusive currents of meaning analysis Shows that these traditions are actually complementary and builds a neostructuralist synthesis on this finding It also outlines the implications of this cultural theoretical synthesis for the field of social theory What emerges is a variant of the theory of practice habit and structuration of society *Words in Time* Edward Lobb,1993
