History of the Doomsday Clock , The Educational Foundation for Nuclear Science recounts the history of the Doomsday Clock which first appeared on the cover of the Bulletin of the Atomic Scientists in June 1947 The clock was created to reflect the danger of nuclear conflict in the world The hands have been moved forward and back reflecting international tensions *The Doomsday Clock At 75* Robert K. Elder,J. C. Gabel,2022-06-28 The Doomsday Clock is many things all at once It s a metaphor it s a logo it s a brand and it s one of the most recognizable symbols of the past 100 years

Chicago landscape artist Martyl Langsdorf who went by her first name professionally created the Doomsday Clock design for the June 1947 cover of the Bulletin of the Atomic Scientists published by the news organization and nonprofit behind the iconic Doomsday Clock. It sits at the crossroads of science and art and therefore communicates an immediacy that few other forms can. As designer Michael Bierut says, the Clock is the most powerful piece of information design of the 20th century. The Doomsday Clock has permeated not only the media landscape but also culture itself. As you'll see in the pages of this book, more than a dozen musicians including The Who, The Clash, and Smashing Pumpkins have written songs about it. It's referenced in countless novels, Stephen King, Piers Anthony comic books, Watchmen, Stormwatch, movies, Dr. Strangelove, The Simpsons, Movie, Justice League, and TV shows, Doctor Who, Madame Secretary. Even the shorthand the way we announce time on the Doomsday Clock, "It is Two Minutes to Midnight" or whatever the current time might be, has been adopted into the global vernacular. Throughout the Doomsday Clock's 75 years, the Bulletin has worked to preserve its integrity and its scientific mission to educate and inform the public. This is why, in part, we wanted to explore this powerful symbol and how it has impacted culture, politics, and global policy, and how it's helped shape discussions and strategies around nuclear risk, climate change, and disruptive technologies. It's a symbol of danger, of hope, of caution, and of our responsibility to one another.
