Data Analysis for Corporate Finance Mariano F. Scandizzo CFA CQF, 2021-12-07 Have you ever tried to learn to code or to use advanced visualization tools If so I am sure you know how daunting it is to learn by yourself Generally tools and books follow an encyclopedism approach i e books attempt to teach every feature about a coding language or tool This implies hundreds if not thousands of pages simply to tackle a single topic whether SQL Python MS Excel MS PowerBI you name it The journey from zero to hero to become proficient using numerical and visualization tools to take your career to the next level becomes an ordeal that requires years and thousands of pages just to begin putting the pieces of the puzzle together However the reality is that you do not need to learn absolutely every available feature to use those tools and deliver a superior project Rather than teaching you about the forest I will discuss specific trees Why Because once you become familiar and confident nurturing a few trees growing a forest becomes a simple process of planting new trees This book provides the fundamental blocks so that you can learn about financial data science and take these tools and start using them tomorrow The scope of the selected tools will empower you to see a considerable improvement in your financial modeling skills The book is designed to provide corporate finance professionals the ability to start immediately using advance tools for concrete real world tasks Therefore this book is all about functionalism It is about providing you with tools that will put you to work and dramatically change the way you analyze data Once you see the benefits it will become natural to keep expanding your domain knowledge leveraging today s endless available educational resources
