

- c. In case E a positive point charge with $+Q$ is a distance s away from a third positive point charge $+q$. In case F ten positive point charges, each with charge $+Q/10$, lie along an arc of radius s centered on a positive point charge $+q$.

Is the net electric force on the $+q$ charge in case E *greater than*, *less than*, or *equal* to the net electric force on the $+q$ charge in case F? Explain.

4. A thin semicircular rod has a total charge $+Q$ uniformly distributed along it. A negative point charge $-Q$ is placed as shown. A test charge $+q$ is placed at point C. (Point C is equidistant from $-Q$ and from all points on the rod.)

Let F_p and F_R represent the force on the test charge due to the point charge and the rod respectively.

- Is the magnitude of F_p *greater than*, *less than*, or *equal* to the magnitude of F_R ? Explain how you can tell.
- Is the magnitude of the *net* force on $+q$ *greater than*, *less than*, or *equal* to the magnitude of F_p ? Explain.
- A second negative point charge $-Q$ is placed as shown.

Is the magnitude of the *net* electric force on $+q$ *greater than*, *less than*, or *equal* to the magnitude of the net electric force on $+q$ in part b? Explain.

Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of

abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation New Progress to First Certificate Teacher's Book Leo Jones,1996-11-07 This new colour edition has been updated to conform to the revised FCE specifications
