Guide for the Management of Expert Systems Development Rand Corporation, 1989

This report was prepared to assist managers in the risk managed application of expert systems ES technology

Two problems that have frustrated managers and technicians who might otherwise be interested in exploring ES solutions are the seeming lack of a software engineering discipline for creating and maintaining expert systems and the fact that the software development risks associated with expert systems have not been clearly addressed

This guide focuses on ES development as a software engineering endeavor and emphasizes that as such it should be subject to much the same discipline as conventional automated information system software

The guide is meant to be used in conjunction with accepted software development methods and standards such as Department of Defense DOD Standards 2167A and 7935.1 DOD Directive 7920.1 DOD Instruction 7920.2 and the OSD Major Automated System Review Council MAISRC Guidelines for Program Managers

This document presents a step by step guideline that addresses the managerial and technical risks of each phase in the software development life cycle of systems that contain ES components
