explores Turing's question from a perspective informed by a detailed understanding of the way modern AI systems work MacCormick explains in accessible fashion the ideas behind the two main pillars of the twenty first century AI revolution deep neural networks and reinforcement learning MacCormick offers a tour of the most famous AI systems including AlexNet and VGG16 deep neural networks for object recognition that led to a Nobel prize DeepMind's AlphaGo which shocked AI researchers with its superhuman performance in the game of Go and OpenAI's ChatGPT which stunned the world with its natural language capabilities He describes how each system works and points to parallels with human brain processes Both human minds and computer programs MacCormick explains can induce intelligence through emergence the capability for new phenomena to emerge from the interactions of many small simple components Does this mean that a computer program can think like a human In many ways MacCormick argues the answer is yes In *Thinking AI* he reveals a new landscape of emergent intelligence a world in which computer programs can emulate many or all aspects of human thinking but humanity retains its meaning and purpose
