

## **BASIC JAVA INTERVIEW QUESTIONS AND ANSWERS**

- 1. What is the most important feature of Java?**  
Java is a platform independent language.
- 2. What do you mean by platform independence?**  
Platform independence means that we can write and compile the java code in one platform (eg: Windows) and can execute the class in any other supported platform eg: (Linux, Solaris, etc).
- 3. Are JVM's platform independent?**  
JVM's are not platform independent. JVM's are platform specific run time implementation provided by the vendor.
- 4. What is a JVM?**  
JVM is Java Virtual Machine which is a run time environment for the compiled java class files.
- 5. What is the difference between a JDK and a JVM?**  
JDK is Java Development Kit which is for development purpose and it includes execution environment also. But JVM is purely a run time environment and hence you will not be able to compile your source files using a JVM.
- 6. What is a pointer and does Java support pointers?**  
Pointer is a reference handle to a memory location. Improper handling of pointers leads to memory leaks and reliability issues hence Java doesn't support the usage of pointers.
- 7. What is the base class of all classes?**  
java.lang.Object
- 8. Does Java support multiple inheritance?**  
Java doesn't support multiple inheritance.
- 9. Is Java a pure object oriented language?**  
Java uses primitive data types and hence is not a pure object oriented language.
- 10. Are arrays primitive data types?**  
In Java, Arrays are objects.
- 11. What is difference between Path and Classpath?**  
Path and Classpath are operating system level environment variables. Path is used define where the system can find the executables(.exe) files and classpath is used to specify the location .class files.

**Java Interview Questions and Answers** Navneet Singh, Java interview questions often cover a broad range of topics including core Java concepts object oriented programming principles data structures algorithms Java APIs and best practices Here are some common Java interview questions along with sample answers What is Java Java is a high level object oriented programming language developed by Sun Microsystems now owned by Oracle It is designed to be platform independent allowing developers to write code once and run it on any Java enabled platform without recompilation What are the main features of Java Some of the main features of Java include Platform independence Java programs can run on any platform with a Java Virtual Machine JVM Object oriented Java supports object oriented programming principles such as encapsulation inheritance and polymorphism Robustness Java provides strong memory management exception handling and type checking mechanisms to ensure robust and reliable code Multi threading Java supports concurrent execution of multiple threads allowing developers to write scalable and responsive applications Portability Java programs are portable across different platforms making them suitable for developing cross platform applications What is the difference between JDK JRE and JVM JDK Java Development Kit is a software development kit that includes tools for developing and compiling Java applications such as the Java compiler javac and the Java runtime environment JRE JRE Java Runtime Environment is a runtime

environment that provides the necessary libraries and components to run Java applications It includes the JVM Java Virtual Machine and core Java libraries JVM Java Virtual Machine is an abstract computing machine that provides an execution environment for Java bytecode It interprets and executes Java bytecode instructions and manages memory threads and other runtime aspects of Java applications What is the difference between abstract class and interface in Java An abstract class is a class that cannot be instantiated and may contain abstract methods methods without a body as well as concrete methods It can also contain instance variables and constructors Subclasses of an abstract class must implement all abstract methods or be declared abstract themselves An interface is a reference type in Java that defines a contract of methods that a class must implement It can only contain constant variables and method signatures without method bodies A class can implement multiple interfaces but can only extend one abstract class What is the difference between Array List and LinkedList in Java Array List is implemented as a dynamic array meaning that it stores elements in a contiguous memory location and supports random access to elements using an index It is efficient for accessing elements by index but less efficient for inserting or removing elements from the middle of the list LinkedList is implemented as a doubly linked list meaning that it stores elements as nodes with references to both the previous and next nodes It is efficient for inserting or removing elements from the middle of the list but less efficient for random access These are just a few examples of Java interview questions Depending on the role and level of the interview questions may cover more advanced topics such as design patterns concurrency memory management and performance optimization It s important to thoroughly prepare for interviews by reviewing core Java concepts practicing coding exercises and gaining hands on experience with Java programming [Core Java Interview Questions You'll Most Likely Be Asked](#) Vibrant Publishers,2021-09-10 Concept refresher for Java includes Java 8 and Java 9 Ideal prep guide for coding interviews technical and HR rounds Guidance for Resume building and Aptitude tests Includes Scenario based questions Developed and recommended by industry experts and placement experts Core Java Interview Questions You ll Most Likely Be Asked Second Edition is your perfect companion to stand above the rest in today s competitive job market With this guide you learn or refresh Core Java fundamentals and principles necessary for cracking the coding interview and acquaint yourself with real life interview questions and strategies to reach the solutions The Resume building tutorial and the Aptitude tests equip you to present yourself better even before the job interview This book is a complete course in itself to prepare for your dream Java job placement About the Series This book is part of the Job Interview Questions series that has more than 75 books dedicated to interview questions and answers for different technical subjects and HR round related topics This series of books is written by experienced placement experts and subject matter experts Unlike comprehensive textbook sized reference guides these books include only the required information for job search Hence these books are short concise and ready to use by students and professionals **Cracking The Programming Interview** : Harry.
