

Unit 19: Digital Graphics for Interactive Media

I am going to analyse two different websites which both sell boxing equipment, one of the websites is "Sugar Ray's" which is the UK's leading boxing store. The other website is "Box Fit UK" which is also a leading store.

Applications of interactive media graphics:

Navigation:

Both websites contain a lot of rollover buttons that allow you to click on in order to navigate around the different content of the site. For example the "Sugar Ray's" website have rollover buttons in the top right hand corner which allow you to navigate to their official YouTube, Facebook and Twitter pages. These pages contain information about where the company is based, any upcoming events or deals they may have placed and most of all it is a social place where customers may re-assure other people that are thinking about buying from them.

However as the website is designed very illustrative it is quite hard to notice the buttons in the top banner, I think it would be more successful if the buttons were enlarged slightly because when first entering the site my attention was drawn straight to the other features of the website and not the important links.

Also the "Sugar Ray's" website uses another range of rollover buttons towards the bottom of the page which allow you to navigate to main sections of the stock such as boxing gloves, boxing boots etc. These rollover buttons are very noticeable and the use of bold block writing draws attention to the link and is easily used to find what product you're looking for.
