Yampolskiy, 2018-07-27 The history of robotics and artificial intelligence in many ways is also the history of humanity's attempts to control such technologies From the Golem of Prague to the military robots of modernity the debate continues as to what degree of independence such entities should have and how to make sure that they do not turn on us its inventors Numerous recent advancements in all aspects of research development and deployment of intelligent systems are well publicized but safety and security issues related to AI are rarely addressed This book is proposed to mitigate this fundamental problem It is comprised of chapters from leading AI Safety researchers addressing different aspects of the AI control problem as it relates to the development of safe and secure artificial intelligence The book is the first edited volume dedicated to addressing challenges of constructing safe and secure advanced machine intelligence The chapters vary in length and technical content from broad interest opinion essays to highly formalized algorithmic approaches to specific problems All chapters are self contained and could be read in any order or skipped without a loss of comprehension **The transformative power of artificial intelligence: A strategic guide for tourism** Roman Egger, 2026-01-15 Artificial intelligence is the new electricity It is not only changing tourism it is rewriting the rules of the game But while new tools and buzzwords are emerging every day uncertainty is growing where to start What is hype what is strategic necessity And how do we utilise this powerful technology without losing the most important thing the human connection to the guest Prof DDr Roman Egger one of the leading experts in this field provides the long overdue compass for this new era Comprehensible well founded and consistently focussed on practice this book builds the decisive bridge between strategic foresight and concrete applicability It is not a short lived IT handbook but a strategic guide for the designers of tomorrow This book guides you safely through the complexity of new technologies and explains how machine learning and generative AI work in a way that empowers decision makers without overwhelming them with technical jargon The focus is consistently on the essentials instead of chasing short lived trends you will learn to develop a clear mindset and integrate AI into your business goals in a meaningful way from marketing to service to the future of work This book is more than just a guide It is a plea for courageous responsible and human centred tourism in the age of AI For all those who not only want to manage the future but actively shape it Goodbye Trust Dick Stroud, 2024-07-24 A healthy and prosperous society needs efficient and trusted institutions Yet the West is experiencing plummeting levels of trust in academia the media politics business the justice system and financial regulators Unhappiness and mental health problems are skyrocketing especially among the young What the hell is going on Everybody has their pet theory it's because of the pandemic social media is addling our minds it's all Donald Trump's fault Or as Elon Musk believes it's the woke mind virus You know what I think it might be a bit more complicated I wasn't satisfied with these superficial explanations After lots of research and questioning I now understand
