

The Vauchall Frontiers was introduced into the UK at the end of 1981. In its fourth, the Frontiers range consisted of a 2.0 litre (1088 cc) petrol engine 3-door model, and a 2.0 litre (1070 cc) petrol engine or 2.0 litre (1080 cc) diesel engine 3-door model. The engines are all self-priming units which have mounted in them Vauchall valves. All engines are of four-cylinder overhead camshaft design, mounted at the front of vehicle with the transmission mounted on its rear.

All models have fully independent front suspension incorporating upper and lower arms, shock absorbers and torsion bars and were originally fitted with a leaf spring rear axle.

A wide range of standard and optional equipment is available within the range to suit most tastes, including central locking, electric windows and air electric mirrors. An air conditioning system was available as an option on certain models.

In early 1986 a soft-top 3-door model was introduced and in early 1986 the model range was completely revised. A new 2.0 litre (1088 cc), 16-valve petrol engine was brought in to replace the 2.0 litre engine and the 2.0 litre (1088 cc) diesel engine was replaced with a new 2.0 litre (1111 cc) engine. At the same time, the body underwent a major overhaul and the leaf spring rear axle was replaced with a new coil spring rear axle arrangement to improve load-carrying and handling. The only other change to the Frontiers model range was the introduction of a new 2.0 litre (1088 cc) diesel engine in the middle of 1988.

Provided that regular servicing is carried out in accordance with the manufacturer's recommendations, the vehicle should prove reliable and economical. The engine compartment is well-designed and most of the items requiring frequent attention are easily accessible.

Vauchall Frontiers 3-door

Vauchall Frontiers Sport

Your Vauchall Frontiers manual

The aim of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work must be done (even about one minute to get it done for a garage) it will also provide information on routine maintenance and servicing and give a logical course of action and diagnosis when serious faults occur. However, it is hoped that you will use the manual by leaving the work unstarted. On simpler jobs it may seem to suggest that leaving the vehicle in a garage and going there later, to look and collect it. Perhaps

most important, a lot of money can be saved by avoiding the costs a garage must charge to come to place and overheads.

The manual has drawings and descriptions to show the location of the various components so that their location can be understood. Terms are described and photographed in a clear step-by-step sequence.

References to left and right of the vehicle are in the context of a person in the driver's seat facing forwards.

Acknowledgements

Thanks are due to Chrysler Group PLC who supplied the numerous drawing and

phot conditions. Certain illustrations are the copyright of Vauchall Motors Limited and are used with their permission. Thanks are also due to Super Tyres Limited, who provided some of the working tools and to all those people at Vauchall who helped in the production of this manual.

We take great pride in the accuracy of information given in this manual, but vehicle manufacturers make alterations and design changes during the production run of a particular vehicle of which they do not inform us. No liability can be accepted by the authors or publishers for loss, damage or injury caused by any errors in, or omissions from, the information given.

Working on your car can be dangerous. The steps shown and some of the potential risks and hazards, with the aim of creating a safety conscious attitude.

General hazards

- Scalding**
- Don't remove the radiator or expansion tank cap while the engine is hot.
 - Engine oil, automatic transmission fluid or power steering fluid may also be dangerous hot if the engine has recently been running.

- Burning**
- Be aware of burns from the exhaust system and from any part of the engine. Brake discs and drums can also be extremely hot immediately after use.

- Crushing**
- When working under or near a raised vehicle, always equip yourself with adequate protection for the back with adequate, or use shock absorbers.

- Slip**
- Don't slip or fall off into a hot engine.
 - Do not smoke or allow naked lights (including your lighted cigarettes) near a vehicle being worked on. Also beware of smoking liquids.

- Fire**
- Fuel is highly flammable. Fuel vapour is explosive.
 - Don't let fuel spill onto a hot engine.
 - Do not smoke or allow naked lights (including your lighted cigarettes) near a vehicle being worked on. Also beware of smoking liquids.
 - Fuel vapour is heavier than air, so don't work on the fuel system with the vehicle over an open fire.
 - Another cause of fire is an electrical short-circuit or short-circuit. Read and understand the instructions.
 - Read a fire extinguisher carefully, it is your ultimate for use in a fire and electrical fire.

- Electric shock**
- Ignition off, storage can be dangerous.
 - Always use adequate protection (gloves with heat shields) when working on a disconnected circuit.
 - Don't touch or stand on a wet surface when working on the ignition system with the engine running or the ignition switched on.

- Always charge in a safe location. Make sure that any flame-resistant equipment is correctly certified. Make sure joints should be protected by a suitable cover device (PVC) about 100mm.

- Fume or gas intoxication**
- Exhaust fumes are poisonous, they often contain carbon monoxide, which is highly toxic if inhaled. Never run the engine in a confined space such as a garage with the doors shut.
 - Fuel vapour is also poisonous, so use the vapour from some cleaning solvents and paint thinners.

- Poisonous or irritant substances**
- Avoid skin contact with battery acid and with any fuel, fuel oil, solvents, especially antifreeze, brake hydraulic fluid and Diesel fuel. Don't swallow them by mouth. If such a substance is swallowed or gets into the eyes, seek medical advice.
 - Prolonged contact with used engine oil can cause skin cancer. Use gloves or use a barrier cream if necessary. Change oil in a well-ventilated area and do not keep any rags in your garage.
 - An irritating refrigerant forms a poisonous gas if released to a closed space (including a cylinder). It can also cause gas burns on contact.

- Asbestos**
- Asbestos dust can cause cancer if inhaled or swallowed. Asbestos may be found in gaskets and in brake and clutch linings. When dealing with such components, it is better to ensure that they contain asbestos.

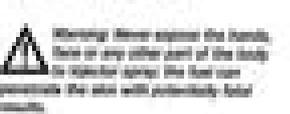

Special hazards

- Hydrofluoric acid**
- This extremely corrosive acid is formed when certain types of synthetic rubber, found in some O-rings, of seals, fuel hoses etc, are exposed to temperatures above 200°C. The rubber changes into a mineral or silicey substance containing the acid. Once formed, the acid remains dangerous for years. If it gets onto the skin, it may be necessary to amputate the limb concerned.
 - When dealing with a vehicle which has suffered a fire, or with components salvaged from such a vehicle, wear protective gloves and clothing from other use.

- The battery**
- Batteries contain sulphuric acid, which attacks clothing, skin and hair. Take care when topping-up or working the battery.
 - The hydrogen gas given off by the battery is highly explosive. Never smoke or allow a naked light nearby, the careful when connecting and disconnecting battery (especially of jump leads).

- All traps**
- All traps (not road traps) if they go off accidentally. Take care when removing the steering wheel and/or horn. Remove storage instructions may apply.

- Diesel injection equipment**
- Diesel injection pumps supply fuel at very high pressures. Take care when working on the fuel injection and fuel pipes.

Remember...

- DO**
- Do use eye protection when using power tools, and when working under the vehicle.
 - Do wear gloves or use barrier cream to protect your hands when necessary.
 - Do get someone to check periodically that oil is not when working under the vehicle.
 - Do check lower clothing and long hair out of the way of moving mechanical parts.
 - Do remove rings, watches etc, before working on the vehicle - especially the electrical system.
 - Do ensure that any lifting or jacking equipment has a safe working load, being adequate for the job.

- DON'T**
- Don't attempt to fit a heavy component which may be heavier than your capacity - get assistance.
 - Don't rush to finish a job, or use shortcuts when busy.
 - Don't use a lifting device which may slip and cause injury.
 - Don't leave tools or parts lying around where someone can trip over them, step on or into hot parts or wires.
 - Don't allow children or pets to play in or near a vehicle being worked on.
