

2.0 Plants play an essential role in the environment and in meeting human needs

2.1 The Role of Plants in the Environment

Plants are necessary for all life on Earth. Plants provide many things for the sustainability of life on our planet. Vegetation in Canada is classified into 4 main categories: forest, tundra, barren and agriculture.

As a critical part of the ecosystem, plants provide **oxygen** for organisms to survive. They are able to **reduce the problem of pollution**, by using carbon dioxide. Plants are also the basis of most food webs as **producers of food** for herbivores and ultimately carnivores. Plants also provide **shelter** for animals, **clean and filter water** and help **prevent soil erosion**.

2.2 We Use Plants in Many Ways

Plants For Food

Nearly 75% of the the world's food supply is based on seven major crops: wheat, rice, maize (corn), potatoes, barley, cassava and sorghum.

Cocoa	Canola	Seaweed	Sugar
Chocolate is made from the fruit of the cocoa tree	78% of vegetable oil production is from canola	contains iodine and is used in soup broths and sushi	half of the world's sugar comes from sugar beets, located in the sugar beets' roots
			
Cocoa beans are roasted, shelled and then crushed. Cocoa butter and cocoa powder are separated. Cocoa powder is then mixed with milk to make chocolate.	Canola is pressed from the canola seeds and used as salad oil and frying oil	other products from seaweed include: ice cream, chocolate milk, yogurt, whipped cream, pies, jellies and candies	roots are shredded, heated in running water and the concentrated clear liquid crystallizes to produce sugar similar to sugar cane
			

People use plants for things other than food.
