**Technical Challenges and Design Issues in Bangla Language Processing** Karim, M. A., Kaykobad, M., Murshed, M., 2013-04-30 Many take advantage of software and hardware accessibility in the English language. However, for non-native speakers, this inevitably becomes a problem, specifically for the complex Bangla language, which is not easily integrated into the world of technology. *Technical Challenges and Design Issues in Bangla Language Processing* addresses the difficulties, as well as the overwhelming benefits associated with creating programs and devices that are accessible to the speakers of the Bangla language. Professionals, students, and researchers interested in expanding the fields of computing, information, and knowledge management and communication technologies in the non-English realm will benefit from this comprehensive collection of research. *International Conference on Innovative Computing and Communications* Ashish Khanna, Deepak Gupta, Siddhartha Bhattacharyya, Aboul Ella Hassanien, Sameer Anand, Ajay Jaiswal, 2021-08-17 This book includes high-quality research papers presented at the Fourth International Conference on Innovative Computing and Communication ICICC 2021, which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on February 20-21, 2021. Introducing the innovative works of scientists, professors, research scholars, students, and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications. *Feature Detectors and Motion Detection in Video Processing* Dey, Nilanjan, Ashour, Amira, Patra, Prasenjit Kr., 2016-10-25 Video is one of the most important forms of multimedia available, as it is utilized for security purposes, to transmit information, promote safety, and provide entertainment. As motion is the most integral element in videos, it is important that motion detection systems and algorithms meet specific requirements to achieve accurate detection of real-time events. *Feature Detectors and Motion Detection in Video Processing* explores innovative methods and approaches to analyzing and retrieving video images. Featuring empirical research and significant frameworks regarding feature detectors and descriptor algorithms, the book is a critical reference source for professionals, researchers, advanced-level students, technology developers, and academicians.

Ehsani, Yimin Gao, K. Butler, 1998. Electrically Peaking Hybrid (ELPH) is a parallel hybrid electric vehicle propulsion concept that was invented at Texas A M University by the advanced vehicle systems research group. Over the past six years, design methodologies, component development, and system optimization work has been going on for this invention. This project was a first attempt in integrating the above developments into an optimized design of an ELPH passenger car. Design specifications were chosen for a full-size passenger car performing as well as any conventional car over the EPA FTP 75 combined city highway drive cycles. The results of this design project were two propulsion systems. Both were

appropriate for commercial production from the point of view of cost availability of the technologies and components One utilized regenerative braking and the other did not Substantial fuel savings and emissions reductions resulted from simulating these designs on the FTP 75 drive cycle For example our ELPH full size car with regenerative braking was capable of delivering over 50 miles per gallon in city driving with corresponding reductions in its emissions This project established the viability of the ELPH concept and the design methodologies in computer simulations More work remains to be done on investigating more advanced power plants such as fuel cells and more advanced components such as switched reluctance motor drives for the designs Furthermore the design optimization can be carried out to more detailed levels for prototyping and production
