Elements Of Spatial Structures Analysis And Design:

Elements of Spatial Structures M. Y. H. Bangash, T. Bangash, 2003 This excellent text highlights all aspects of the analysis and design of elements related to spatial structures which have been carefully selected from existing structures Analysing the design of elements of any full scale structure that contains facilities that have already been constructed makes good economic sense and avoids duplication in respect of research and development the decision making process and accurate design criteria for new constructed facilities

Analysis, Design and Construction of Steel Space Frames G.S. Ramaswamy, Mick Eekhout, G. R. Suresh, 2002 Space frames provide a lightweight solution to the problem of creating large span enclosures free from obstructions They are employed in many major construction projects across the world as documented in this authoritatively written volume This is the first in depth book to present all instances and applications of space frames in various engineering schemes It uses case studies and numerous illustrations to examine steel space frames from their design to their structural engineering performance Analysis Design and Construction of Steel Space Frames will be of particular use to practitioners through its use of various leading design codes including the Eurocodes Boasting an international authorship with wide experience in the research development and manufacture of space frames this book also draws contributions from leading practitioners and academics specialising in this area from across the globe

Shell and Spatial Structures: Computational Aspects Guido De Roeck, Avelino Samartin Quiroga, Marcel A.V.A. Van Laethem, Edgard Backx, 1987-03-31 In recent years powerful engineering workstations for a reasonable price become a valuable tool for the design of complicated constructions such as shell and spatial structures This availability causes an

increasing use of advanced numerical techniques for the static and dynamic analysis of these structures also in the non linear range The I A S S Working Group nO 13 concerned with Numerical Methods in Shell and Spatial Structures and the Department of Civil Engineering of the Katholieke Universiteit Leuven have taken the initiative to organise an International Symposium providing a forum for discussion and exchange of views between researchers specialists in numerical analysis on one hand and designers practising engineer ings on the other hand These Proceedings contain the papers presented at the Symposium held in Leuven July 14 16 1986 The papers are organised in five sections 1 Shell structures 2 Spatial structures 3 Dynamic analysis 4 Non linear analysis 5 Presentation and interpretation of results The papers covering more than one domain are classified following the main subject We hope that researchers as well as practising engineers will find a lot of useful information in the book *Design of Steel Structures (Vol. 1)* Ramchandra,V.
