independent book allows material to be taught using Java C or other Object Oriented Programming Languages

Distributed Object Technology with Corba and Java Cheng-Chieh Cheng,2000    A Multi-server Distributed Object System Using Java and Internet Yiwen Gu,1996    Java Distributed Computing Jim Farley,1998 This book shows how to build software in which two or more computers cooperate to produce results It covers Java s RMI Remote Method Invocation facility in addition to CORBA and strategies for developing a distributed framework It pays attention to often neglected issues such as protocol design security and bandwidth requirements    *Engineering Distributed Objects* Wolfgang Emmerich (Dr. Rer. Nat.),2000 Wolfgang Emmerich *Engineering Distributed Objects* The pay offs for creating distributed applications are in achieving portability scalability and fault tolerance In order to simplify building software that performs robustly regardless of platform or network infrastructure a new strata of middleware has been created This book provides a conceptual framework within which to describe object oriented middleware for the integration of distributed objects UML is used to explain distributed systems concepts Presenting both an extended case study and smaller illustrative examples there are plenty of coded examples in Java C CORBA IDL and Microsoft IDL which reflect the reality of today s multi language heterogeneous systems This is a book for developers who are new to programming in distributed environments It also supports a variety of courses where the central theme is object oriented development with middleware technologies The book shows the middleware concepts and principles using examples taken from OMG CORBA Microsoft COM Java RMI On the accompanying website <http://www.distributedobjects.com> are exercises sample solutions and working code for the examples This site is also designed for instructors to assist them with course development and delivery    Garbage Collection for Java Distributed Objects ,2001    **Engineering Distributed Objects** Wolfgang Emmerich,Stefan Tai,2014-01-15    **Distributed Computing in Java 9** Raja Malleswara Rao Pattamsetti,2017-06-30 Explore the power of distributed computing to write concurrent scalable applications in Java About This Book Make the best of Java 9 features to write succinct code Handle large amounts of data using HPC Make use of AWS and Google App Engine along with Java to establish a powerful remote computation system Who This Book Is For This book is for basic to intermediate level Java developers who is aware of object oriented programming and Java basic concepts What You Will Learn Understand the basic concepts of parallel and distributed computing programming Achieve performance improvement using parallel processing multithreading concurrency memory sharing and hpc cluster computing Get an in depth understanding of Enterprise Messaging concepts with Java Messaging Service and Web Services in the context of Enterprise Integration Patterns Work with Distributed Database technologies Understand how to develop and deploy a distributed application on different cloud platforms including Amazon Web Service and Docker CaaS Concepts Explore big data technologies Effectively test and debug distributed systems Gain thorough knowledge of security standards for distributed applications including two way Secure Socket Layer In Detail Distributed computing is the concept with which a bigger computation process is accomplished by splitting it into

multiple smaller logical activities and performed by diverse systems resulting in maximized performance in lower infrastructure investment This book will teach you how to improve the performance of traditional applications through the usage of parallelism and optimized resource utilization in Java 9 After a brief introduction to the fundamentals of distributed and parallel computing the book moves on to explain different ways of communicating with remote systems objects in a distributed architecture You will learn about asynchronous messaging with enterprise integration and related patterns and how to handle large amount of data using HPC and implement distributed computing for databases Moving on it explains how to deploy distributed applications on different cloud platforms and self contained application development You will also learn about big data technologies and understand how they contribute to distributed computing The book concludes with the detailed coverage of testing debugging troubleshooting and security aspects of distributed applications so the programs you build are robust efficient and secure Style and approach This is a step by step practical guide with real world examples

*Instant CORBA* Robert Orfali, Dan Harkey, Jeri Edwards, 1997-03-28 Distributed CORBA Objects have found their killer app It s the Object Web or the marriage of distributed objects and the Internet The major computing companies including Sun JavaSoft IBM Netscape Apple Oracle BEA and HP have chosen CORBA IIOP as their common way to connect distributed objects across the Internet and intranets Consequently CORBA is about to become as ubiquitous as TCP IP *Instant CORBA* is your quick guide to understanding this revolutionary new technology If you re in a real hurry this book even provides a condensed tour that will make you CORBA literate in four hours or less Written in a friendly and witty style this comprehensive book covers The Object Web or how CORBA IIOP Java and the Internet are coming together Everything you need to know about a CORBA 2.0 ORB The 15 CORBA Object Services including Transactions Trader Security Naming Events Time and Collections These services provide the next step in the evolution of distributed objects CORBA s Dynamic Object Facilities such as Callbacks Dynamic Invocations Object Introspection and the Interface Repository Next generation ORB technology including CORBA 3.0 s Messaging Pass by Value and Server Side Frameworks The marriage of CORBA with MOM and TP Monitors Forthcoming CORBA attractions such as mobile agents shippable places and the business object framework Products such as Iona s OrbixWeb Netscape Visigenic s VisiBroker and Sun s NEO JOE The authors have written many best selling books including *The Essential Distributed Objects Survival Guide* and *The Essential Client Server Survival Guide* Second Edition which won Software Development s Jolt Award for the best book of 1994 in its first edition Their most recent book is *Client Server Programming with Java and CORBA A Study and Analysis of Distributed Object Technology* Reza Kaviani, 1999 **Java Distributed Collaborative Environment (JDCE)** Shrideep B. Pallickara, L.C. Smith College of Engineering and Computer Science, 1998 [Distributed Object Architectures with CORBA](#) Henry Balen, 2000-02-13 *Distributed Object Architectures with CORBA* is a guide to designing software comprised of distributed components While it is based on OMG s Common Object Request Broker Architecture CORBA standard the principles also apply to architecture

built with other technology such as Microsoft's DCOM As ORB products evolve to incorporate new additions to CORBA the knowledge and experience required to build stable and scalable systems is not widespread With this volume the reader can develop the skills and knowledge that are necessary for building such systems The book assumes a familiarity with object oriented concepts and the basics of CORBA Software developers who are new to building systems with CORBA based technologies will find this a useful guide to effective development

**A Theory of Distributed Objects** Denis Caromel, Ludovic Henrio, 2005-04-13 Distributed and communicating objects are becoming ubiquitous In global Grid and Peer to Peer computing environments extensive use is made of objects interacting through method calls So far no general formalism has been proposed for the foundation of such systems Caromel and Henrio are the first to define a calculus for distributed objects interacting using asynchronous method calls with generalized futures i e wait by necessity a must in large scale systems providing both high structuring and low coupling and thus scalability The authors provide very generic results on expressiveness and determinism and the potential of their approach is further demonstrated by its capacity to cope with advanced issues such as mobility groups and components Researchers and graduate students will find here an extensive review of concurrent languages and calculi with comprehensive figures and summaries Developers of distributed systems can adopt the many implementation strategies that are presented and analyzed in detail Preface by Luca Cardelli

**Engineering Distributed Objects** Claude L. Emmerich, Wolfgang Emmerich, 2000-04 Constructing a distributed system is quite different from using one to create applications that can perform in a distributed environment While other books simply focus on the building of infrastructures this one shows the reader how to create these applications on top of distributed components This unique approach will help software developers achieve portability and provide multi user access over networks Divided into two parts Concepts Infrastructures for Distributed Objects Java Microsoft DCOM OMG CORBA and Common Design Problems this book provides the latest technology developments

**Distributed Java Object Computing with RMI and JDBC.** Qin Liu, 1999 *JavaSpaces Principles, Patterns, and Practice* Eric Freeman, Susanne Hupfer, Ken Arnold, 1999 Annotation JavaSpaces technology is a powerful Jini service from Sun Microsystems Inc that facilitates building distributed applications The JavaSpaces model provides persistent object exchange areas in which remote Java processes can coordinate their actions and exchange data JavaSpaces technology supplies a necessary cross platform framework for distributed computing with Jini technology This book introduces the JavaSpaces technology architecture and provides a comprehensive description of the model Using an example driven approach this book shows you how to use JavaSpaces technology to develop distributed computing applications JavaSpaces Principles Patterns and Practice also includes two full scale applications one collaborative and the other parallel that demonstrate how to put the JavaSpaces model to work
