Source: [Knowles Precision Devices, LLC](#)

To choose the right filter for your application, you first need to have a solid understanding of how to evaluate filter types and identify the specific filter technology that will best suit your application.

### Filter Types

To start, there are four filter response types that can be used to define the frequencies that will be removed or allowed by the filter.

#### Low Pass

Low pass filters allow frequencies below a given frequency to pass (be transmitted or received) while rejecting frequencies above the given frequency.

Figure 1. An illustration of a how a low pass filter works.

#### High Pass

High pass filters function in the opposite manner of a low pass filter. High pass filters let frequencies above a given frequency pass through the filter while rejecting frequencies below the given frequency.

Figure 2. An illustration of a how a high pass filter works.

#### Band Pass

Band pass filters pass frequencies between two frequencies (set upper and a lower limits) while rejecting all other frequencies.
