

Multimedia based E-Learning

The influence of multimedia and video based content in computer-based learning specifically geared toward the progressive education of the elderly. Multimedia technology refers to interactive, computer-based applications that allow people to communicate ideas and information with Animations, digital and print elements.

Professionals in the field use computer software to develop and manage online graphics and content. The work that media technology specialists produce is used in various media publishing, such as training programs, web pages, and news sites.

Multimedia use in classroom will provide opportunity for interacting with diverse texts that give students a solid background in the tasks and content of mainstream college courses. Now, multimedia is also getting included in Schools content.

The introduction of video based content and Animations have positively affected students enabling the delivery of interactive study material as well as enabling students to adapt to different learning styles.

This type of Schools content can effectively make students comfortable with different courses and reduce the time taken by each student to understand the learning structure which in turn can allow students to spend more time on understand the content material of the course.
