you'll cover projects from domains such as predictive analytics to analyze the stock market and recommendation systems for GitHub repositories. In addition to this, you'll also work on projects from the NLP domain to create a custom news feed using frameworks such as scikit-learn, TensorFlow, and Keras. Following this, you'll learn how to build an advanced chatbot and scale things up using PySpark. In the concluding chapters, you can look forward to exciting insights into deep learning and you'll even create an application using computer vision and neural networks. By the end of this book, you'll be able to analyze data seamlessly and make a powerful impact through your projects.

What you will learn:

- Understand the Python data science stack and commonly used algorithms.
- Build a model to forecast the performance of an Initial Public Offering (IPO) over an initial discrete trading window.
- Understand NLP concepts by creating a custom news feed.
- Create applications that will recommend GitHub repositories based on ones you've starred, watched, or forked.
- Gain the skills to build a chatbot from scratch using PySpark.
- Develop a market prediction app using stock data.
- Delve into advanced concepts such as computer vision, neural networks, and deep learning.

Who this book is for: This book is for machine learning practitioners, data scientists, and deep learning enthusiasts who want to take their machine learning skills to the next level by building real-world projects. The intermediate-level guide will help you to implement libraries from the Python ecosystem to build a variety of projects addressing various machine learning domains.

Knowledge of Python programming and machine learning concepts will be helpful.

Promoting Positive Learning Experiences in Middle School Education Gaines, Cherie Barnett, Hutson, Kristy M., 2021-01-15. Declining academic performance along with a growing apathy of students toward the value of education demonstrates that students in the United States public education system do not recognize the value of a positive experience in middle schools. A plethora of research and writing has been done on elementary schools and secondary schools, but middle school education as a whole has been left behind. For this reason, there is the need for current research on all aspects and topics that may contribute to middle school student success. *Promoting Positive Learning Experiences in Middle School Education* focuses on the ideal conditions for maximizing student success and engagement in middle school education. The chapters take a deeper look into the modern tools, technologies, methods, and theories driving current research on middle school students, their teachers, their classroom environment, and their learning. Highlighting topics such as curriculum reform, instructional strategies, and practices, effective teaching, and technology in the modern classroom, this book is ideally intended for middle school teachers, middle school administrators, and school district administrators, along with practitioners, stakeholders, researchers, academicians, and students interested in middle school education and student success.
