By examining the reasons behind the preventive criminalization of Chinese criminal law this book argues that the shift of criminal law generates popular expectations of legislative participation and meets punitive demands of the public but the expansion of criminal law lacks effective constraints which will keep restricting people's freedom in the future. The book is inspired by the eighth amendment of Chinese criminal law in 2011 which amended several penalties related to road drug and environmental safety. It is on the eighth amendment that subsequent amendments have been based. The amendment stemmed from a series of nationally known incidents that triggered widespread public dissatisfaction with the Chinese criminal justice system. Based on John Kingdon's theory of the multiple streams the book explains the origins of the legislative process and its outcomes by examining the role of public opinion policy experts and political actors in the making of Chinese criminal law. It argues that in authoritarian China the prominence of risk control through criminal justice methods is a state

response to uncertainties generated through reforms under the CCP's leadership. The process of criminal lawmaking has become more responsive and inclusive than ever before even though it remains a consultation with the elites within the framework set by the Chinese Communist Party (CCP) including representatives of the Lianghui government ministries, academics and others. The process enhances the CCP's legitimacy by not only generating popular expectations of legislative participation but also by meeting the punitive demands of the public. The book will be of interest to academics and researchers in the areas of Chinese criminal law and comparative law.

Research Methods in Publishing and Book Studies  
Rachel Noorda, Corinna Norrick-Rühl, 2025-09-02

Establishing the unique opportunities and characteristics of doing research in publishing and book studies, this book demonstrates and evaluates the range of research methods that are available to students when conducting research within the field. Organized into three main parts prefaced by a general introduction to the discipline, Research Methods in Publishing and Book Studies considers qualitative and quantitative methods and methods of data analysis in turn. Each chapter within these sections features details and logistics of the research method including specific ethical considerations, disciplinary history and distinguishing features when compared to other methods. Advantages and disadvantages of the method help students evaluate and choose the right method for their research. A case study of the Method in Action, written by featured authors with expertise in that area, provides study questions to help readers test and solidify their knowledge. Further reading suggestions are provided. By the end of the book, students will have a sound understanding of the methods commonly used in book and publishing studies and will be able to confidently identify and select methods for their own research projects and dissertations. This book is an essential resource for advanced undergraduate and postgraduate students and researchers in book and publishing studies.

**ICEMS 2019** Salamah Agung, Dwi Nanto, A. Adrefiza, Aodah Diamah, Ismarita Ramayanti, 2020-01-14

Proceedings of the 5th International Conference on Education in Muslim Society (ICEMS) contain papers from researchers, academicians, teachers, school principals, government agencies and consultants in various fields of education: social sciences, humanities, Arabic and English linguistics. There were 110 full papers submitted and after reviewed by at least two reviewers, 39 of them are successfully published in the proceedings. The articles were submitted and presented at the 5th ICEMS held by Faculty of Educational Sciences, FITK, supported by Center for Research and Community Service (LP2M) UIN Syarif Hidayatullah Jakarta. The 5th ICEMS centers on the issue of creativity and innovation in teaching and learning, a crucial issue to be discussed to improve the teaching and learning quality which in turn ultimately raise the overall education quality. In the future, the subsequent proceeding would be able to consistently grow into one prestigious annual proceeding by publishing papers from varied different fields of study, particularly in education.

*Handbook of Complementary Methods in Education Research*

Judith L. Green, Judith Green, Gregory Camilli, Patricia B. Elmore, Patricia Elmore, 2012-01-04 Published for the American Educational Research Association by Routledge *The Handbook of Complementary Methods in Education Research* is a successor volume to AERA's earlier and highly acclaimed editions of *Complementary Methods for Research in Education*. More than any book to date including its predecessors, this new volume brings together the wide range of research methods used to study education and makes the logic of inquiry for each method clear and accessible. Each method is described in detail including its history, its research design, the questions that it addresses, ways of using the method, and ways of analyzing and reporting outcomes. Key features of this indispensable book include the following:

**Foundations Section** Part I is unique among research books. Its three chapters examine common philosophical, epistemological, and ethical issues facing researchers from all traditions and frames ways of understanding the similarities and differences among traditions. Together they provide a tripartite lens through which to view and compare all research methods.

**Comprehensive Coverage** Part II, the heart of the book, presents 35 chapters on research design and analysis. Each chapter includes a brief historical overview of the research tradition, examines the questions that it addresses, and presents an example of how the approach can be used.

**Programs of Research** Part III examines how research programs connected to eight specific lines of inquiry have evolved over time. These chapters examine phenomena such as classroom interaction, language research, issues of race, culture, and difference, policy analysis, program evaluation, student learning, and teacher education.

**Complementary Methods** As the title suggests, a central mission of this book is to explore the compatibility of different research methods. Which methods can be productively brought together and for what purposes? How and on what scale can they be made compatible, and what phenomena are they best suited to explore?

**Flexibility** The chapters in Parts II and III are largely independent. Therefore, selected portions of the book can be used in courses devoted to specific research methods and perspectives or to particular areas of education. Likewise, established researchers interested in acquiring new techniques or greater expertise in a given methodology will find this an indispensable reference volume.

This handbook is appropriate for any of the following audiences: faculty, teaching and graduate students studying education research, education researchers and other scholars seeking an accessible overview of state-of-the-art knowledge about specific methods, policy analysts, and other professionals needing to better understand research methods and academic and research libraries serving these audiences.
