Over the past number of years the Curtiss-Wright DAS Studio 3 configuration software has been growing in capability and the KSM-500 software has been phased out. This communication is announcing that KSM-500 1.19 will be the last release of KSM-500. It will be entering end of life.

The KSM-500 1.19 release will include module support for KAD/ADC/135/B and KAD/VID/105/B, plus some minor bug fixes and enhancements. The planned release date for KSM-500 1.19 is April 2017.

It is not necessary for customers to switch from KSM-500 for existing programs. Critical bugs discovered in the field will be either resolved or we will assist in the transition to DAS Studio 3. No further module support or features will be added to KSM-500. DAS Studio 3 is being recommended for new programs. Our support department will assist any customers looking to transition from KSM-500 to DAS Studio 3 for existing programs. Training can be arranged with our support department for customers who have not yet transitioned to DAS Studio 3. The current release of DAS Studio 3 is 3.4.1 (see the DAS Studio 3 data sheet for supported modules). We will release DAS Studio 3 every quarter.

## Recorder Studio 3 discontinued

As of May 2016, Recorder Studio 3 (setup software for network switches and recorders) is discontinued. As Recorder Studio 3 is a subset of DAS Studio 3, its functionality is already incorporated therein.

Any hardware (such as network switches or recorders) that previously shipped with Recorder Studio 3, will instead ship with DAS Studio 3.
