

### Check Electrolyte

1. Inspect the battery compartment for loose connections, frayed cables and properly secured battery restraint.
2. Clean the top of the battery. If necessary, clean the top of the battery with a solution of baking soda and hot water.

#### NOTICE

Vent caps must be tight to prevent acid solution from entering battery cells.

A clean battery top is essential to avoid conductive paths on higher voltage batteries.

To make the solution, add 0.5 kg (1 lb) of baking soda to 4 liters (1 gallon) of water. Use a brush having flexible bristles. Apply the soda solution to the top of the battery until the cleaning action of the soda stops. After cleaning action has stopped, rinse batteries thoroughly with water. Dry the batteries with low air pressure.

3. Check the specific gravity of the battery. If the specific gravity reading is below 1.150, the battery must be charged.

#### NOTICE

The battery should not be used if a difference in specific gravity between two cells is greater than .020. If this condition exists, the battery should be put on an equalization charge. If this does not correct the condition, consult your battery supplier.

4. Check the electrolyte level of all cells. Maintain the electrolyte level about 13 mm (.50 inch) above the plates. Add water as needed. Use only distilled water. Water is always added after a battery is charged.
5. Lower the seat and battery cover. To closed position and secure with the latch on the front of the cover.
6. Connect the battery.

### Battery Exchanging

**NOTE:** Batteries should be changed, water added and charged only in areas where proper protective and ventilation facilities are provided.

1. Refer to 'Battery Access' topic for battery access.
2. Cover the battery with fringed battery cover or with plywood.
3. Install insulated battery tray and hood, of sufficient capacity, to the battery.
4. Remove the battery. Recharge the battery.
5. Install a fully-charged battery.
6. Remove the battery tray. Remove fringed battery cover or plywood from the top of the battery.
7. Connect the battery.
8. Lower the seat and battery cover to closed and secure with the latch on the front of the cover.
9. Adjust the seat position.

### Battery Charging

#### WARNING

When charging, proper protection must be made for venting of the charging gases. Battery container lids and the covers of battery compartments must be opened or removed. The vent plugs should stay on the cells and remain closed.

#### With Battery Installed in Lift Truck
