and multitasking Memory management ensures efficient allocation and use of system memory File systems organize and store data securely The operating system manages input and output devices through drivers Concepts such as deadlocks synchronization and concurrency are explained Security and protection mechanisms safeguard system resources Different types of operating systems including batch real time and distributed systems are discussed Overall operating systems enable efficient reliable and secure computer operation Information Systems Reengineering, Integration and Normalization Joseph S. P. Fong, Kenneth Wong Ting Yan, 2022-01-01 Database technology is an important subject in Computer Science Every large company and nation needs a database to store information The technology has evolved from file systems in the 60 s to Hierarchical and Network databases in the 70 s to relational databases in the 80 s object oriented databases in the 90 s and to XML documents and NoSQL today As a result there is a need to reengineer and update old databases into new databases This book presents solutions for this task In this fourth edition Chapter 9 Heterogeneous Database Connectivity JDBC offers a database gateway platform for companies to communicate with each other not only with their data but also via their database The ability of sharing a database can contribute to the applications of Big Data and surveys for decision support systems The JDBC gateway solution collects input from the database transfers the data into its middleware storage converts it into a common data format such as XML documents and then distributes them to the users JDBC transforms the common data into the target database to meet the user s requirements acting like a voltage transformer hub The voltage transformer converts the voltage to a voltage required by the users Similarly JDBC transforms the database to the target database required by the users This book covers reengineering for data conversion integration for combining databases and merging databases and expert system rules normalization for eliminating duplicate data from the database and above all JDBC connects all legacy databases to one target database for the users The authors provide a forum for readers to ask questions and the answers are given by the authors and the other readers on the Internet *Proceedings of ACM-SIGMOD 1985 International Conference on Management of Data, May 28-31, 1985, LaMansion Hotel, Austin, Texas* Sham Navathe, 1985 **Proceedings of the Twenty-fifth International Conference on Very Large Databases, Edinburgh, Scotland, UK, 7-10 September, 1999** Malcolm Atkinson, 1999 This is the silver anniversary of one of the longest running database conferences VLDB is among the best established forums for discussion in the international database community and is organized every year by the VLDB Endowment *Tutorial--database Management* James A.
