Modelling Written Communication Deirdre Pratt, 2011-01-19 This book offers an alternative view to current postmodern approaches to composition. It takes a critical realist stance to arrive at the essence of written communication with the aim of informing a practical application: a computerised writing tutor. Following Robert Franck's seminal work on modelling a theoretical model of writing was first formulated, consisting of an architecture of functions which constitute the prerequisites for effective communication. Next, an applied model, a composing algorithm with an input option, was developed, showing composing to be a systemic social process with intra and extra systemic variation. The algorithm provided the design template for a writing tutor program which models for the learner both the systemic and the socially situated nature of writing. This book establishes composing as a communicative interaction and shows the essential dynamism of writing while offering an exemplar of a systems approach to modelling in the social sciences. *Answer Key For Linguistics* Victoria A.

Fromkin, Donca Steriade, Pamela Munro, Bruce Hayes, Susan Curtiss, Anna Szabolcsi, Tim Stowell, Edward Stabler, Dominique Sportiche, Hilda Koopman, Patricia Keating, Nina Hyams, 2001-08-22 *Linguistics: An Introduction to Linguistic Theory* is a textbook written for introductory courses in linguistic theory for undergraduate linguistics majors and first-year graduate students. Twelve major figures in the field bring their expertise to each of the core areas of the field: morphology, syntax, semantics, phonetics, phonology, and language acquisition. In each section, the book is concerned with discussing the underlying principles common to all languages, showing how these are revealed in language acquisition and in the specific grammars of the world's languages. Theoretical concepts are introduced through the analysis of a wide set of language data from Arabic to Zulu. The student will learn how to do linguistics by working through real linguistic data. Each section explains how to define and solve a problem, organizes the data into paradigms revealing the structured patterns in the data, formulates generalizations based on these patterns, proposes rules or principles to account for the generalization, seeks independent evidence in its argument for the proposed theoretical construct. The book brings the latest developments in theoretical linguistics to bear in its discussion of the traditional issues. It covers these subjects in greater depth than is found in most introductory texts, permitting the student to proceed directly after using this text to graduate courses in the field. It contains problems, a glossary, and a bibliography for further reading. *Linguistics* is supported by an instructor's manual. *Rhetorical Theory and Praxis in the Business Communication Classroom* Kristen Getchell, Paula Lentz, 2018-09-10 Winner of the Association for Business Communication's 2019 Distinguished Book Award, *Rhetorical Theory and Praxis in the Business Communication Classroom* responds to a significant need in the emerging field of business communication as the first collection of its type to establish a connection between rhetorical theory and practice in the business communication classroom. The volume includes topics such as rhetorical grammar, genre awareness in business communication theory, the role of big data in message strategy, social media and memory, and the connection between rhetorical theory and
