**Multi-Threaded Object-Oriented MPI-Based Message Passing Interface** Jean-Marc Adamo,2012-12-06 Multi Threaded Object Oriented MPI Based Message Passing Interface The ARCH Library presents ARCH a library built as an extension to MPI ARCH relies on a small set of programming abstractions that allow the writing of well structured multi threaded parallel codes according to the object oriented programming style ARCH has been written with C The book describes the built in classes and illustrates their use through several template application cases in several fields of interest Distributed Algorithms global completion detection distributed process serialization Parallel Combinatorial Optimization A procedure Parallel Image Processing segmentation by region growing It shows how new application level distributed data types such as a distributed tree and a distributed graph can be derived from the built in classes A feature of interest to readers is that both the library and the application codes used for illustration purposes are available via the Internet The material can be downloaded for installation and personal parallel code

development on the reader's computer system ARCH can be run on Unix Linux as well as Windows NT based platforms Current installations include the IBM SP2 the CRAY T3E the Intel Paragon PC networks under Linux or Windows NT Multi Threaded Object Oriented MPI Based Message Passing Interface The ARCH Library is aimed at scientists who need to implement parallel distributed algorithms requiring complicated local and or distributed control structures It can also benefit parallel distributed program developers who wish to write codes in the object oriented style The author has been using ARCH for several years as a medium to teach parallel and network programming Teachers can employ the library for the same purpose while students can use it for training Although ARCH has been used so far in an academic environment it will be an effective tool for professionals as well Multi Threaded Object Oriented MPI Based Message Passing Interface The ARCH Library is suitable as a secondary text for a graduate level course on Data Communications and Networks Programming Languages Algorithms and Computational Theory and Distributed Computing and as a reference for researchers and practitioners in industry

**Emerging Technologies to Promote and Evaluate Physical Activity** Dan J Graham, James Aaron Hipp, Simon Marshall, Jacqueline Kerr, 2014-10-23 Increasingly efforts to promote and measure physical activity are achieving greater precision greater ease of use and or greater scope by incorporating emerging technologies This is significant for physical activity promotion because more precise measurement will allow investigators to better understand where when and how physical activity is and is not occurring thus enabling more effective targeting of

particular behavior settings Emerging technologies associated with the measurement and evaluation of physical activity are noteworthy because 1 Their ease of use and transferability can greatly increase external validity of measures and findings 2 Technologies can significantly increase the ability to analyze patterns 3 They can improve the ongoing systematic collection and analysis of public health surveillance due to real time capabilities associated with many emerging technologies 4 There is a need for research and papers about the cyberinfrastructure required to cope with big data multiple streams processing aggregation visualization etc and 5 Increasingly blurred boundaries between measurement and intervention activity e g the quantified self self tracking movement may necessitate a reevaluation of the conventional scientific model for designing and evaluating these sorts of studies There have been many recent disparate advances related to this topic Advances such as crowdsourcing allow for input from large diverse audiences that can help to identify and improve infrastructure for activity e g large group identification of environmental features that are conducive or inhibiting to physical activity on a national and even global scale Technologies such as Global Positioning Systems GPS and accelerometry are now available in many mobile phones and can be used for identifying and promoting activity and also understanding naturalistically occurring activity SenseCam and other personal visual devices and mobile apps provide person point of view context to physical activity lifestyle and timing Further multiple sensor systems are enabling better identification of types of activities like stair climbing and jumping that could not previously be identified readily using objective measures like pedometers or accelerometers in isolation The ability of activity sensors to send data to remote servers allows for the incorporation of online technology e g employing an online social network as a source of inspiration or accountability to achieve physical activity goals and websites such as Stickk com enable individuals to make public contracts visible to other users and also incorporates financial incentives and disincentives in order to promote behaviors including physical activity In addition the increasing use of active gaming e g Wii XBox Kinect in homes schools and other venues further underscores the growing link between technology and physical activity Improvements in mathematical models and computer algorithms also allow greater capacity for classifying and evaluating physical activity improving consistency across research studies Emerging technologies in the promotion and evaluation of physical activity is a significant area of interest because of its ability to greatly increase the amount and quality of global recorded measurements of PA patterns and its potential to more effectively promote PA Emerging technologies related to physical activity build on our own and others interdisciplinary collaborations in employing technology to address public health challenges This research area is innovative in that it uses emerging resources including social media crowdsourcing and online gaming to better understand patterns of physical activity *Railroads* William Zebina Ripley,1915
