Performance Evaluation of Computer and Communication Systems. Milestones and Future Challenges Karin Anna Hummel, Helmut Hlavacs, Wilfried Gansterer, 2011-12-13 This Festschrift volume is published in honor of G nter Haring on the occasion of his emerital celebration and contains invited papers by key researchers in the field of performance evaluation presented at the workshop Performance Evaluation of Computer and Communication Systems Milestones and Future Challenges PERFORM 2010 held in Vienna Austria in October 2010 G nter Haring has dedicated most of his scientific professional life to performance evaluation and the design of distributed systems contributing in particular to the field of workload characterization In addition to his own contributions and leadership in international research projects he is and has been an excellent mentor of young researchers demonstrated by their own brilliant scientific careers The 20 thoroughly refereed papers range from visionary to in depth research papers and are organized in the following topical sections milestones and evolutions trends green ICT and virtual machines modeling mobility and mobile networks communication and computer networks and load balancing analysis and management

Computational Modelling in Hydraulic and Coastal Engineering Christopher Koutitas, Panagiotis D. Scarlatos, 2015-12-02 Combines More Than 40 Years of Expert Experience Computational modelling and simulation methods have a wide range of applications in hydraulic and coastal engineering Computational Modelling in Hydraulic and Coastal Engineering provides an introductory but comprehensive coverage of these methods It emphasizes the use of the finite differences meth *Principles and Practice of Ground Improvement* Jie Han, 2015-06-22 Gain a stronger foundation with optimal ground improvement Before you break ground on a new structure you need to analyze the structure of the ground Expert analysis and optimization of the geo materials on your site can mean the difference between a lasting structure and a school in a sinkhole Sometimes problematic geology is expected because of the location but other times it s only unearthed once construction has begun You need to be able to quickly adapt your project plan to include an improvement to unfavorable ground before the project can safely continue Principles and Practice of Ground Improvement is the only comprehensive up to date compendium of solutions to this critical aspect of civil engineering Dr Jie Han registered Professional Engineer and preeminent voice in geotechnical engineering is the ultimate guide to the methods and best practices of ground improvement Han walks you through various ground improvement solutions and provides theoretical and practical advice for determining which technique fits each situation Follow examples to find solutions to complex problems Complete homework problems to tackle issues that present themselves in the field Study design procedures for each technique to simplify field implementation Brush up on modern ground improvement technologies to keep abreast of all available options Principles and Practice of Ground Improvement can be used as a textbook and includes Powerpoint slides for instructors It s also a handy field reference for contractors and

installers who actually implement plans There are many ground improvement solutions out there but there is no single right answer to every situation Principles and Practice of Ground Improvement will give you the information you need to analyze the problem then design and implement the best possible solution
